I note on Mr. Stephen's The Hammer on X (Twitter) and mentioned

Exclusive: Pentagon Admits Chemtrails Are Real — Leaked memo confirms military aerial spray program, admits Fort Detrick and Pine Bluff ties, Congressional probe demanded

Air Force Special Operations Command (AFSOC) has admitted to conducting aerial spraying of chemicals from aircraft over Fort Detrick, Maryland, and Pine Bluff, Arkansas, in a leaked internal report. These documents show that the aerial spray program was conducted by United States Air Force Reserve Command (AFRC) **Deployment Operations and Operations Management (DOOM)**.

ICA'S ADULTICIDE RECORDS SHOWING THE U.S. MILITARY SPRAYS TOXIC PESTICIDES IN U.S. RESIDENTIAL AREAS

June 19, 2024

ICA's legal team recently obtained records through FOIA showing that the U.S. military sprayed toxic pesticides in residential areas, and in some cases, the spraying is actually done at night (when insects are most active), so you likely couldn't realize that you have been sprayed. **ICA's Director of Aerial Spray Systems**, which can carry a total of 2,000 gallons of pesticide, herbicide or chemtrail. The agent is then distributed over a 300 foot wide swath, at a rate of 2 to 20 ounces per gallon.

The documents also include the unit's flight records, which show where these **chemtrail** or pesticide spraying operations were conducted. Spraying was done in Texas, Louisiana, Virginia, Perry Island in South Carolina, and the City of Burlington in Vermont, Lake Champlain, and Lake Tahoe.

The records also show that the pesticides listed monocyclic that were inside the aerial spray tanks are toxic to humans, and are classified as a carcinogen, and a potential endocrine disruptor, causing **medically created spraying areas with high cancer rates. Also, if this chemicals being sprayed are too dangerous for baby eagles, how are they affecting us?**

Many documents show that the **chemtrail** and the **aerial spray** agent more than 20 years, mostly containing the highly toxic organophosphate pesticide Naled, which kills insects by destroying their nervous system.

In humans, symptoms of pesticide poisoning include headaches, muscle twitching, seizures, diarrhea, vomiting, and eventually paralysis, seizures, especially in children, and death. Pesticides are designed to be highly toxic to insects and other pests.

Pesticides are also known to be highly toxic to humans and pets. Exposure to pesticides can cause cancer, birth defects, and other health problems.

Rest assured that ICA's long-term is digging into this issue and has already sent requests to the Pentagon, the Department of Defense, and the Department of Energy to get the bottom, the water and the soil was given our food or requesting accessibility of what the pesticides being sprayed **do** and what it means **a** threat to our health or to the environment.

To support Nature legal actions fine this, click here for details.

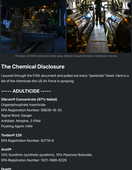
WATCH (Modular Aerial Spray System)



The Chemical Disclosure

I posted through the FOIA document and pulled out every "pesticide" listed. Here is a list of the chemicals the Air Force is spraying:

----- ADULTICIDE -----

Diflunisal Concentrate (87% Naled)
Organophosphate Insecticide
EPA Registration Number 1386-94-1A
Signal Word: Danger
Antidote: Atropine, 2-PAM
Flushing Agent: Urtiv

Tactoil® CW
EPA Registration Number 42728-8

AmeriPr
EPA Registration Number 2935-1
Formulated Product Insecticide, 10% Pyrethrins

DuoPr
Pyrethrins (1%), Synthetic (5%), Piperonyl Butoxide (9%)
EPA Registration Number 1021-1760-8229

Dichlorvos (DDVP) Ai Naled
EPA Registration Number 2935-91-2461
Formulated Product Insecticide, Naled Concentrate

Concentrate (Liquid Concentrate)
Dichlorvos (DDVP) Ai Naled, 90
Formulated Product Insecticide

DuoPr
EPA Registration Number: 2935-491, EPA SLN #FL-000078

Aquabert® 20-20
Ready-to-Use Insecticide Fogging Fluid Insecticide

----- LARVACIDE -----

Altosid® Liquid Larvicide Concentrate (9043)
EPA Registration Number 2724-391

Vectobacter® 1340 (12000 IT/mg)
EPA Registration Number 2724-392

Vectobacter® WDG (Bacillus thuringiensis israelensis)
EPA Registration Number 2724-392

Vectobacter® BS
EPA Registration Number: UNKNOWN

----- HERBICIDE -----

Kreep 20%
EPA Registration Number: 350-320
