Question 1

An attack player fouls inside their attacking circle and a free hit is awarded to the defense. The defender chooses to take the free hit quickly from inside the circle. The defender undercuts the ball and an opponent standing on the dotted circle line must take evasive action to avoid being hit high on the body. The umpire deems the play dangerous. The restart of play should be:

- A. A free hit to the attack team at the dotted circle line
- B. A free hit to the attack just outside the hard circle line
- C. A penalty corner to the attack team
- D. Play on as the distance is too far for danger

SENIOR BULLS SHOOT OUT ANSWERS

ANSWER: C: A penalty corner to the attack team... Rule 9.8 - Players must not play the ball dangerously or in a way which leads to dangerous play. A ball is also considered dangerous when it causes legitimate evasive action by opponents. The penalty is awarded where the action causing the danger took place... Since the action causing the danger was inside the circle, thus the award of a penalty corner.

Question 3

A defending player inside their defending 23-meter/25-yard area but outside the circle intentionally kicks the ball away after the award of a free hit to the attack. The umpire should:

- A. Award a free hit to the attack and verbally warn the defender
- B. Award a free hit to the attack and card the defender
- C. Award a penalty corner to the attack only.
- D. Award a penalty corner to the attack and card the defender

ANSWER: D: Award a penalty corner to the attack and card the defender...12.3.c - A penalty corner is awarded: for an intentional offense by a defender outside the circle but within the 23 meters area they are defending...Since the foul is intentional, thus the PC as the technical foul as per the rules. The card is for the misconduct of complete disregard for the rules and fair play. In this instance remember it is intentional, not by accident.

Question 4.

Question 5

The attack team is awarded a free hit just outside the 23-meter/25-yard area. The attacker hits the ball toward the circle. The ball is deflected by a defender just outside the circle and raises to about knee height. Inside the circle a defender gets hit on the knee with the ball and it travels to an attacker who immediately and legally puts the ball in the goal. The umpire should:

- A. Award a free hit to the attack outside the circle where the first deflection happened
- B. Award a Penalty Corner because of the defender's use of the body inside the circle
- C. Award the goal
- D. Award a free hit to the defense from where the original free hit was taken

ANSWER: C: Award the goal...Rule 12.1 - Advantage: a penalty is awarded only when a player or team has been disadvantaged by an opponent breaking the Rules... Since the original deflection was from a defender and then the ball hits one of their teammates in the leg, there is no danger or disadvantage to the attack as the ball then goes to an area where the attack can shoot on goal legally. If the ball had stayed in the playing space of the defender hit by the ball and they retained possession, then a PC would be awarded as the defense gained an advantage from the ball hitting the leg. This instance is the proper application of the advantage rule.
