BEYOND LIGHTS

HIGH-PERFORMANCE BLEACHING POWDER
FOR NATURAL OR COLORED HAIR

FARCOM
PROFESSIONAL

FORMULA with BONDING PLEX TECHNOLOGY

Designed to enhance hair care during the bleaching process, this formula helps protect hair bonds from breakage, preserving elasticity and strength.

KEY ADVANTAGES

- **Lightens Up to 8 Levels:** Achieve significant color lifting with precision.
- **Uniform Results:** Provides consistent, even lightening.
- **Perfect for Freehand Techniques:** Ideal for use without foil, allowing for creative and flexible application.
- **Non-Volatile:** Reduces the risk of airborne particles, ensuring a cleaner and more controlled application.

- **Chalky Effect & Thick Texture:** Easy to apply, with a smooth consistency that ensures optimal control.
- **Precision Application:** Excellent for achieving fine details and intricate work.
- **Vegan Friendly:** No animal-derived ingredients, suitable for vegan clients.

INSTRUCTIONS FOR USE

Use the hair bleaching powder in combination with **FARCOM PROFESSIONAL CREAM DEVELOPER 3% - 10 Vol, 6% - 20 Vol, or 9% - 30 Vol** (depending on the desired lightening level).

Mixing Ratio 1:1½ or 1:2

Mix **1 part of BEYOND LIGHTS** hair bleaching powder with + **1½ or 2 parts of FARCOM PROFESSIONAL CREAM DEVELOPER** in a non-metallic bowl.

Application on natural hair (FIRST-TIME USE) or dyed hair:

- Apply the mixture evenly to unwashed, dry hair. Leave on until the desired lightening level is reached.
The processing time varies depending on hair condition and the desired blonde shade. (Maximum recommended processing time: 50 minutes.)
- Rinse with lukewarm water and apply **BIOPROTEIN Hairplex Bond Saver No2** for 5 minutes. Continue with shampooing.

Do not use heat sources to reduce the processing time.

Application on hair with previous chemical treatments (BALAYAGE, HIGHLIGHTS, ETC.):

- Apply the mixture evenly to unwashed, dry hair. Leave on until the desired lightening level is reached.
The processing time varies depending on hair condition and the desired blonde shade. (Maximum recommended processing time: 50 minutes.)
- Rinse with lukewarm water and apply **BIOPROTEIN Hairplex Bond Saver No2** for 5 minutes. Continue with shampooing.

Do not use heat sources to reduce the processing time.

TIP: The lower the strength of the oxidizing cream used in the mixture, the gentler the lightening process. The final result depends on the strength of the CREAM DEVELOPER, the initial hair color, hair quality, and processing time.
