CRYSTAL LIGHTS

HIGH-PERFORMANCE BLEACHING POWDER
FOR NATURAL OR COLORED HAIR

FARCOM
PROFESSIONAL

SPECIAL FORMULA infused with
BONDING PLEX TECHNOLOGY
+ **NEW-GENERATION WARM-TONE**
NEUTRALIZING PIGMENTS

This formula not only enhances hair care during the bleaching process but also neutralizes unwanted warm tones.

Helps protect hair bonds during the bleaching process, preserving hair's elasticity and strength.

Delivers uniform, bright, cool blonde results with a pure, crystal-clear shine in every professional service.

KEY ADVANTAGES

- Up to **9** levels of lift.
- Ideal for achieving pastel or intense blonde shades.
- Creamy, thick texture for easy, flexible application.

- Suitable for color corrections, even on fragile or damaged hair.
- Faster action for efficient results.
- Non-volatile for a more controlled application.
- Vegan Friendly with no animal-derived ingredients.

INSTRUCTIONS FOR USE

Use in combination with **FARCOM PROFESSIONAL CREAM DEVELOPER 3% - 10 Vol, 6% - 20 Vol or 9% - 30 Vol** (depending on the desired degree of lightening).

ALWAYS COMPLETE THE SERVICE WITH BIOPROTEIN Hairplex Bond Saver No2 to protect hair bonds and maintain strength.

EXTRA TIP: Enhance results with BIOPROTEIN Hairplex Bond Prolonger 03 as a home treatment to prolong the benefits of the BIOPROTEIN Hairplex treatment.

Mixing Ratio 1:1½ or 1:2

Mix **1 part of CRYSTAL LIGHTS** hair bleaching powder with + **1½ or 2 parts of FARCOM PROFESSIONAL CREAM DEVELOPER** in a non-metallic bowl.

Application on natural hair (FIRST-TIME USE) or dyed hair:

- Apply the mixture evenly to unwashed, dry hair. Leave on until the desired lightening level is reached.
The processing time varies depending on hair condition and the desired blonde shade. (Maximum recommended processing time: 50 minutes.)
- Rinse with lukewarm water and apply **BIOPROTEIN Hairplex Bond Saver No2** for 5 minutes. Continue with shampooing.

Do not use heat sources to reduce the processing time.

Application on hair with previous chemical treatments (BALAYAGE, HIGHLIGHTS, ETC.):

- Apply the mixture evenly to unwashed, dry hair. Leave on until the desired lightening level is reached.
The processing time varies depending on hair condition and the desired blonde shade. (Maximum recommended processing time: 50 minutes.)
- Rinse with lukewarm water and apply **BIOPROTEIN Hairplex Bond Saver No2** for 5 minutes. Continue with shampooing.

Do not use heat sources to reduce the processing time.

TIP: The lower the strength of the oxidizing cream used in the mixture, the gentler the lightening process. The final result depends on the strength of the CREAM DEVELOPER, the initial hair color, hair quality, and processing time.
