— WINES INSPIRED BY AFRICA'S WILDLIFE —

THE LEOPARD SAUVIGNON BLANC

WHEN EMBARKING ON A GAME DRIVE, THE MOST SOUGHT-AFTER SIGHTING IS OFTEN THE MAJESTIC LEOPARD. IN A SIMILAR VEIN, SAUVIGNON BLANC HOLDS A SPECIAL PLACE IN THE HEARTS OF WINE ENTHUSIASTS AS THE MOST CONSUMED WINE IN SOUTH AFRICA.

EXPERIENCE THE LEOPARD SAUVIGNON BLANC. FRESH AND VIBRANT, THIS MEDIUM-BODIED WINE DELIGHTS WITH TROPICAL FRUIT AROMAS, SUBTLE CITRUS UNDERTONES, AND A CRISP, REFRESHING FINISH.

THE BUFFALO CHENIN BLANC

THE BUFFALO, KNOWN FOR ITS STRENGTH AND DOMINANCE, COMMANDS RESPECT IN THE ANIMAL KINGDOM. SIMILARLY, THE CHENIN BLANC POSSESSES A REFINED AND COMPLEX CHARACTER, EXHIBITING A WIDE RANGE OF FLAVOURS, FROM CRISP AND ACIDIC TO RICH AND HONEYED.

INDULGE IN THE BUFFALO CHENIN BLANC. BRIGHT AND ELEGANT, THIS MEDIUM-BODIED WINE OFFERS FRESH MINERALITY WITH AROMAS OF RIPE WATERMELON, COMPLEMENTED BY CITRUS, LITCHI, AND DELICATE ASPARAGUS UNDERTONES.

THE ZEBRA ROSÉ

THE ZEBRA, WITH ITS STRIKING BLACK AND WHITE STRIPES, IS A SYMBOL OF INDIVIDUALITY AND BALANCE. JUST AS NO TWO ZEBRA ARE ALIKE, OUR ROSÉ CAPTURES A UNIQUE BLEND OF FRESHNESS AND ELEGANCE. THE ZEBRA REVEALS A PLAYFUL AND DISTINCTIVE ADDITION TO OUR COLLECTION, ADDING CONTRAST AND CHARACTER TO OUR ENSEMBLE OF BOLD AND ICONIC WINES.

THE ZEBRA IS REFRESHING, THIS WINE REVEALS VIBRANT AROMAS OF RED FRUITS SUCH AS STRAWBERRY AND POMEGRANATE, WITH CRISP ACIDITY AND A BEAUTIFUL FINISH.

100%

Freshness Preserved

Hermetic sealing and inert gas flushing lock in fresh-from-the-vinery flavor for every sip.

250ml

Portion Control

The perfect single-serve measurement. Enjoy premium wine without the commitment or waste of a full bottle.

Zero

Wine Waste

No more half-empty bottles oxidizing in the fridge. Cans eliminate the leftover wine problem entirely.

Total

Light Protection

100% protection against UV light, preventing light strike and preserving the delicate aromatics of the wine.

80%

Lower Footprint

Aluminum cans significantly reduce transport emissions compared to heavy, bulky glass bottles.

THE
RHINO
PINOTAGE

THE RHINO, A SYMBOL OF SOUTH AFRICA'S WILDLIFE HERITAGE, IS KNOWN FOR ITS STRENGTH AND RESILIENCE. SIMILARLY, PINOTAGE, A DISTINCTLY SOUTH AFRICAN WINE AND GRAPE VARIETY, EMBODIES THE COUNTRY'S UNIQUE CHARACTER AND FLAVORS. WITH ITS BOLD AND ROBUST NATURE, PINOTAGE REFLECTS THE RHINO'S ICONIC PRESENCE.

THE RHINO PINOTAGE DELIGHTS IN A HARMONIOUS BLEND OF FLAVOURS, A COMPLEX, MEDIUM-BODIED WINE BURSTING WITH RED FRUIT FLAVOURS, INCLUDING PLUMS AND PRUNES, OFFERING AN ELEGANT PALATE AND A LONG, LINGERING FINISH.

THE
ELEPHANT
MERLOT

AS THE MOST POWERFUL OF THE BIG 5, THE ELEPHANT EMBODIES CALM AND MAJESTY. SIMILARLY, THE MERLOT POSSESSES A GENTLE AND SMOOTH CHARACTER THAT ALIGNS WELL WITH THE PEACEFUL NATURE OF THE ELEPHANT.

THE ELEPHANT MERLOT INDULGES IN ITS RICH AND ROBUST FLAVOUR PROFILE, A COMPLEX, MEDIUM-BODIED WINE WITH ENTICING AROMAS OF BLACKBERRIES AND CASSIS, OFFERING DARK FRUIT INTENSITY AND A SMOOTH, VELVETY FINISH.

THE
LION
CABERNET SAUVIGNON

THE LION IS OFTEN REFERRED TO AS THE "KING OF THE JUNGLE" DUE TO ITS MAJESTIC PRESENCE AND DOMINANT POSITION WITHIN ITS ECOSYSTEM. SIMILARLY, CABERNET SAUVIGNON IS CONSIDERED ONE OF THE MOST PRESTIGIOUS AND REVERED RED WINE VARIETALS, KNOWN FOR ITS BOLDNESS, COMPLEXITY, AND ABILITY TO AGE GRACEFULLY.

THE LION CABERNET SAUVIGNON IS A DELIGHTFUL, COMPLEX MEDIUM-BODIED WINE SHOWCASING RICH DARK FRUIT NOTES AND SUBTLE HINTS OF TOBACCO LEAF, WITH WELL-INTEGRATED OAK AND A SMOOTH LINGERING FINISH.

THE TECHNOLOGY INSIDE THE CAN

LIQUID NITROGEN PROTECTION

A small dose of liquid nitrogen is introduced into the can. As the liquid nitrogen expands into gas, it creates a gentle internal pressure that strengthens the aluminum can, improving its resistance to dents during transportation while maintaining the integrity of the packaging. Unlike other gases, nitrogen is completely inert and does not interact with the wine. It preserves the wine exactly as intended by the winemaker, without influencing taste, aroma, or composition.

WHY NITROGEN?

- 🐾 Protects the wine against oxidation.
- 🐾 Preserves delicate fruit aromas and varietal character.
- 🐾 Maintains natural colour and freshness.
- 🐾 Extends product shelf life.
- 🐾 Strengthens the can through controlled internal pressure.
- 🐾 Maintains the wine's original flavour profile.
- 🐾 The recognised global standard for premium canned still wines.

Although argon offers excellent protection due to its density, nitrogen remains the preferred choice throughout the global canned wine industry. It provides exceptional product protection while also reinforcing the can, making it the most effective and commercially proven solution for premium canned wine.

HIGH-PERFORMANCE BPA-NI POLYMER LINING

The quality of the wine is also protected from within. Every Big 5 Wines can features a high-performance BPA-NI (Bisphenol A Non-Intent) food-grade polymer lining, specifically developed for acidic beverages such as wine. Wine naturally contains organic acids that would react with untreated aluminum. The advanced polymer lining creates an invisible protective barrier between the wine and the can, preventing corrosion while ensuring the wine retains its original purity, aroma, flavour, and colour. Engineered for premium beverages, the lining provides outstanding resistance to acidity, alcohol, sulfites, and naturally occurring wine compounds. It also helps maintain product stability throughout storage, transport, and international distribution.

BENEFITS OF THE BPA-NI POLYMER LINING

- 🐾 Prevents any contact between the wine and the aluminum can.
- 🐾 Protects against corrosion and metallic flavours.
- 🐾 Preserves aroma, colour, and flavour throughout the product's shelf life.
- 🐾 Provides excellent resistance to acidic wines and alcohol.
- 🐾 Supports long-term product stability during local and international distribution.
- 🐾 Manufactured to meet modern international food-contact and packaging standards.

A PACKAGING SYSTEM DESIGNED FOR PREMIUM SOUTH AFRICAN WINE

South African wines are celebrated for their vibrant fruit expression, exceptional balance, and world-class quality. Preserving these characteristics requires packaging that meets the same high standards as the wine itself. The combination of nitrogen protection and a high-performance BPA-NI polymer lining represents the benchmark in modern canned wine packaging. Working together, these technologies protect every aspect of the wine—from its first aromas to its final finish—ensuring that each can delivers the authentic character intended by the winemaker.

For consumers, this means a consistently fresh and enjoyable wine experience. For retailers and distributors, it provides a durable, reliable, and export-ready package capable of maintaining quality throughout demanding supply chains.

At Big 5 Wines, every can reflects our commitment to innovation, craftsmanship, and the excellence of South African winemaking—delivering premium quality with every pour.
