OUR FIELD OF SERVICE

At Captor Systems Ltd, we are committed to providing exceptional services in the following field:

Deterrent Systems.

In this field we do installations, integrations and supply of the security systems such as CCTV systems, Alarms systems, Biometric Access Control Systems, Fire and smoke detecting Systems, Intercom Systems, Automated gates and Electric fencing projects.

Security Radio Systems Supplies and integration.

As Captor systems, we value and acknowledge the importance of using high quality and advance 2ways communications radios and high resolution and user friendly Body Worn Cameras that are key play in security industry, civil engineering sector, Mining sector, Agriculture sector, and public emergency services provider such as fire brigade and health to just mention a few on the list. We will take full responsibilities of supplying any quantity as per client's needs, we will provide full technical support and maintenances based on our set principles and warranties. Our 2way radios and Body Worn Cameras are of high stands capable to bridge the communication in order to coordinate teams. They have geo-fencing, Panic, speed limit functionalities and they are all weather resilient. After observing the recklessness of other service providers in our beloved country who take advantage in providing low and unreliable products on the market, the thing that is costing our nation a lot of money. We the Captor Systems Ltd, we are potential to provide reliable high standard security 2way radios and Body Worn Cameras with longevity as one way to improve technology and reduce costs for the nation.

Tracking Systems.

Captor Systems Ltd is committed in providing tracking systems such as Vehicle tracking systems and fleet management systems, Passenger counting and reading systems for public transporting service provider, Parcel tracking systems, Kids and pet tracking systems and all assets tracking systems that are capable to give reports, routes, geo-fencing and emergency alarms of the whereabouts of their kids, vehicles and parcels in real time. The Homes owners, Properties owners, companies and organizations will benefit from our tracking systems.

In far Tracking services is concerned, we are planning to also establish armed recovery unit for all stolen vehicles and abducted kids in our country as one way to enhance human and asset security cordially with security entities.

ICT Systems

For decades our country as whole has been experiencing Information and communication technology deficiency that has impacted the growth of our country in

all sectors because we do not use the advanced technological systems such as Network Infrastructures, Cloud services, Cybersecurity Services, software and hardware services a thing that really deprived our country. We therefore want to take a lead in improving ICT services as we join our government and private sector in executing our ICT services in our country. We will reliably offers Cybersecurity awareness service, cloud computing services, remote and on-site technical support and advisory to our clients for both software and hardware of all ICT systems equipment for their company or organization based on our company's polices.
