1: Introduction

This document defines the information security policy of Hazard 360 Ltd.

As a modern, forward-looking business, Hazard 360 Ltd recognises at senior levels the need to ensure that its business operates smoothly and without interruption for the benefit of its customers, shareholders and other stakeholders.

In order to provide such a level of continuous operation, Hazard 360 Ltd has implemented a set of information security controls to address its perceived risks.

<u>Information security has many benefits for the business, including:</u>

- Protection of revenue streams and company profitability
- Ensuring the supply of goods and services to customers
- Maintenance and enhancement of shareholder value
- Compliance with legal and regulatory requirements

This policy applies to all systems, people and processes that constitute the organization's information systems, including board members, directors, employees, suppliers and other third parties who have access to Hazard 360 Ltd systems.

The following supporting documents are relevant to this information security policy and provide additional information about how it is applied:

- Cloud Computing Policy
- Mobile Device Policy
- Access Control Policy
- Cryptographic Policy
- Physical Security Policy
- Anti-Malware Policy
- Network Security Policy
- Electronic Messaging Policy
- Data Protection Policy

2: Information Security Policy

2.1 Information Security Requirements

A clear definition of the requirements for information security within Hazard 360 ltd will be agreed and maintained with the internal business and cloud service customers so that all information security activity is focussed on the fulfilment of those requirements. Statutory, regulatory and contractual requirements will also be documented and input to the planning process. Specific requirements with regard to the security of new or changed systems or services will be captured as part of the design stage of each project.

It is a fundamental principle of the Hazard 360 Ltd information security programme that the controls implemented are driven by business needs and this will be regularly communicated to all staff through team meetings and briefing documents.

Approved By: Alan Smith	Director – Hazard 360 Ltd	Version Date: 1 st Jan 2022
Security Classification: Internal	Page 3 of 6	Review Date: 1 st Dec 2023

2.2 Framework for Setting Objectives

A regular cycle will be used for the setting of objectives for information security, to coincide with the budget planning cycle. This will ensure that adequate funding is obtained for the improvement activities identified. These objectives will be based upon a clear understanding of the business requirements, informed by the management review process during which the views of relevant interested parties may be obtained.

Information security objectives will be documented for an agreed time period, together with details of how they will be achieved. These will be evaluated and monitored as part of management reviews to ensure that they remain valid. If amendments are required, these will be managed through the change management process.

Information security controls will be adopted where appropriate by Hazard 360 Ltd. These will be reviewed on a regular basis in the light of the outcome from risk assessments and in line with information security risk treatment plans.

In addition, enhanced and additional controls from relevant codes of practice will be adopted and implemented where appropriate. The adoption of these codes of practice will provide additional assurance to our customers and help further with our compliance with international data protection legislation.

2.3 Continual Improvement of Information Security

Hazard 360 Ltd policy with regard to continual improvement is to:

- Continually improve the effectiveness of information security controls
- Enhance current processes to bring them into line with good practice as defined within relevant standards
- Increase the level of proactivity (and the stakeholder perception of proactivity) with regard to information security
- Make information security processes and controls more measurable in order to provide a sound basis for informed decisions
- Review relevant metrics on an annual basis to assess whether it is appropriate to change them, based on collected historical data
- Obtain ideas for improvement via regular meetings and other forms of communication with interested parties, including cloud service customers
- Review ideas for improvement at regular management meetings in order to prioritise and assess timescales and benefits

Ideas for improvements may be obtained from any source including employees, customers, suppliers, IT staff, risk assessments and service reports. Once identified they will be recorded and evaluated as part of management reviews

2.4 Information Security Policy Areas

Hazard 360 Ltd defines policy in a wide variety of information security-related areas which are described in detail in a comprehensive set of policy documentation that accompanies this overarching information security policy.

Information Security Policy	Hazard 360 Ltd	Version: INF / PLY / 002
Approved By: Alan Smith	Director – Hazard 360 Ltd	Version Date: 1 st Jan 2022
Security Classification: Internal	Page 4 of 6	Review Date: 1st Dec 2023

Each of these policies is defined and agreed by one or more people with competence in the relevant area and, once formally approved, is communicated to an appropriate audience, both within and external to, the organization.

The table below shows the individual policies within the documentation set and summarises each policy's content and the target audience of interested parties.

Associated Policy Documents:
