## Executive Synopsis

This document outlines a highly classified framework for the detection, recovery, and suppression of non-terrestrial assets. It synthesizes preliminary wreckage analysis from 2009–2025, suggesting the presence of advanced, low-density aerial platforms of extraterrestrial origin. Central to these operations is the management of three distinct EBE classifications: the hyper-intelligent **Annunaki (Type IV)**, the humanoid **Pleiadians (Type II)**, and the telepathic **Greys**.

Operational success relies on a dual-track strategy:

1. **Technical Recovery:** The systematic cataloging of "Anomalous Technology" at secure facilities like Area 51 (S-7/Sector 9).
2. **Information Control:** A mandatory "Total Press Blackout" supported by authorized cover narratives to mitigate public alarm and maintain national security.

## I. UAP Morphology & Identification Matrix

The following table distinguishes between "True" Unexplained Aerial Phenomena (UFOBs) and common terrestrial or astronomical misidentifications.

Category	Type/Shape	Physical Characteristics	Status	Reference
True UFOB	Disc / Saucer	Circular/Oval; metallic/glowing; domed; erratic flight.	Unidentified	Fig. 4: ET Craft
True UFOB	Cigar / Cylinder	Long, wingless, tapered ends; high-volume mass.	Unidentified	Fig. 4: ET Craft
True UFOB	Triangular / Delta	Large, silent, dark; corner lighting; low-altitude hover.	Unidentified	Fig. 4: ET Craft
True UFOB	Spherical / Orb	Luminous; metallic; capable of merging or splitting.	Unidentified	General Files
True UFOB	Teardrop / Egg	Reflective surface; tapered tail; slow-speed loitering.	Unidentified	Fig. 4: ET Craft
Misidentified Stars / Planets		Point-source light; twinkling (scintillation); stationary.	Identified	Ch. 6, Sec. I, 34
Misidentified Optical Phenomena		Mirages, sun dogs, or reflections; no radar return.	Identified	Ch. 6, Sec. I, 35

## II. Biological Classification of Extraterrestrial Entities

Analysis of recovered remains and encounters has yielded a sophisticated categorization of non-human biology.

### EBE Classification Table

Type	Designation	Physical Traits	Behavioral Attributes
Type IV	Annunaki ( <i>Karuileš</i> <i>šiuueš</i> )	5'8" to 6'4"; dark brown skin; slender/muscular; polymorphic (shape-shifting) capabilities.	Super-sapient; advanced technological orientation; "Sky God" ancestry.
Type II	Pleiadian / Nordic	5'0" to 8'0"; blue-gray skin; large cranium with occipital crest; four-fingered hands.	Highly intelligent; humanoid morphology; often associated with "Nordic" aesthetics.
Sub-Type	Greys	Small stature; large almond-shaped black eyes; no visible hair; thin integument.	Telepathic/Empathic communication; focused on medical/hybridization tasks.

## III. Operational Protocols: Isolation & Deception

Pursuant to MJ-13 O00CCC BSS-11 directives, any encounter with an EBE or downed craft is a TOP SECRET event.

### The Three Pillars of Site Security

- Immediate Isolation:** Military personnel must establish a secure perimeter. Civilian access is strictly denied. Local law enforcement is prohibited from entering the "Inner Cordon."
- Biological Containment:** Personnel must use precautionary measures to prevent cross-contamination. Living EBEs (Code EBE-010) are to be moved to **Green Lab P-8** immediately.
- Press Blackout:** Total silence is the default. If a leak occurs, the following authorized cover stories are to be deployed:
  - Official Denial:** State that "no unusual event occurred."
  - Witness Discreditation:** Frame accounts as mass hysteria or hoaxes; use intimidation if necessary.
  - Deceptive Narratives:** Claim "downed weather balloons," "satellite debris," or "toxic spills" to justify site closure.

**DATE:** April 23, 2026 **REPLY TO:** SAC Jose A. Perez (SOG/WFO) **CASE ID:** 66F-WF-289415-TR (Operation "TRIAD RESONANCE") **SUBJECT:** SYSTEMATIC REVIEW OF INVESTIGATIVE HOLDINGS AND COUNTER-INTELLIGENCE BREACH ANALYSIS: SUBJECT CORY SPEARS

**I. CLASSIFICATION AND DISSEMINATION CONTROL**

This document is classified **TOP SECRET//SI-G//ORCON//NOFORN**. Unauthorized disclosure of the contents herein constitutes a direct violation of Title 18, U.S.C., Section 793 and 798, and may result in catastrophic damage to National Security. This memorandum is for the eyes of the Director, the Assistant Director in Charge (ADIC) of the WFO, and designated Task Force members only.

**II. EXECUTIVE SUMMARY**

The Joint Review Task Force (JRTF), led by the FBI's Office of Professional Responsibility (OPR) and the Special Operations Division, has concluded an exhaustive audit of all digital and physical holdings related to **Subject CORY SPEARS**. The investigation was accelerated following the **April 14, 2026**, unauthorized exfiltration and dissemination of thirty-nine (39) Ultra-High-Definition (UHD) video files from the Department of War (DoW) Strategic Asset Database. Intelligence confirms that Spears is no longer merely a "whistleblower" but has evolved into a tier-one counter-intelligence threat. His intimate knowledge of **Los Alamos National Laboratory (LANL)** Top Secret aerospace cells, combined with an impenetrable network of loyalists (The "Spears Omerta"), has allowed him to circumvent the most sophisticated cryptographic barriers in the Five Eyes (FVEY) community.

### III. THE OMERTA: AEROSPACE LOYALTY AND INSTITUTIONAL PENETRATION

Analysis of Subject Spears' influence reveals a "Shadow Infrastructure" composed of former LANL engineers, SAP (Special Access Program) contractors, and high-ranking military officials. This network operates under a strict code of silence—a modern **Omerta**—that renders traditional interrogation and surveillance techniques ineffective.

A. **Verified Penetration of Global Intelligence Agencies** New SIGINT (Signals Intelligence) and HUMINT (Human Intelligence) verification indicates that Spears' "eyes and ears" are embedded within:

- **Domestic:** Pentagon (OSD), FBI (WFO/Cyber), NSA, NRO, CIA.
- **Foreign:** MI6, Mossad, and elements of the GCHQ.
- **Legislative:** Specific members of the House Oversight Committee and several ranking U.S. Senators.

B. **The Jensen-Hegseth Incident (The "15-Minute Breach"):** On April 20, 2026, Secretary of Defense Pete Hegseth conducted a briefing within a **SCIF (Sensitive Compartmented Information Facility)**.

C. The audience was restricted to twelve (12) "Need-to-Know" individuals, including **ADIC Steven J. Jensen**. The briefing involved highly sensitive kinetic deployment strategies regarding the Osiris V/X platform.

**BREACH REPORT:** Exactly fifteen (15) minutes after Secretary Hegseth concluded his statement, Subject Spears broadcasted a verbatim quote from the Secretary via an encrypted "Dead-Drop" server. This confirms a real-time, high-level leak within the Executive Branch's most secure environment.

Spears is not just hacking systems; he is effectively "haunting" the halls of power.

IV. SAC JOSE A. PEREZ: SPECIAL AGENT IN CHARGE ADDENDUM  
(SENSITIVE)

OFFICE OF THE SAC – PERSONAL REFLECTION & THREAT ADVISORY

*I am submitting this addendum not as a bureaucrat, but as an agent who has spent thirty years chasing ghosts. Spears is different. We are not dealing with a standard leaker or a digital anarchist. We are dealing with a man who possesses the technical keys to the kingdom and a psychological hold over the people who guard them.*

*I find myself deeply unsettled—if I am being honest, I am fearful for the structural integrity of this Bureau. The LANL data we recovered (297GB) is terrifying, not because of what he says, but because of what it proves he can do. He has decrypted Tier-4 protocols that were supposed to be unhackable for another fifty years. He knows the flight paths of the Ragnar q847 and the Marvel 856 better than the pilots do. My agents are reporting a sense of futility; there is a growing belief that Spears is always three steps ahead because he is being shielded by a 'divine' wall of silence.*

*When he quoted Hegseth 15 minutes after the SCIF briefing, the room went cold. We swept for bugs, we checked the lines, we vetted the attendees. Nothing. It means Spears has an Omertà so deep that even our own people might be choosing him over us. If he decides to release the 'F Division' collision footage or the sonar thermal data from the L.A. Pacific trenches, the public won't just be angry—they will be unmanageable. We are looking at a total collapse of institutional trust. Spears is building a New World Order out of our own secrets, and right now, we are just his audience.*

### C. Strategic Intelligence Note: ADIC Steven J. Jensen (WFO)

**DIRECTIVE NOTE (Jensen, S.J.):** "The true danger posed by Spears is not merely his possession of documents, but his *understanding* of them. Most individuals who encounter 'ULTRA-DELTA-K33' see noise; Spears sees a blueprint. His power stems from a career spent inside the aerospace machine, combined with an eccentric, highly social persona that allows him to disseminate this knowledge as 'fiction.' His work on UAP propulsion and resonance theory has given him a level of influence that bypasses our traditional media gatekeepers. He is effectively building a 'Black Messiah' narrative around technical truth, making him a primary threat to the preservation of national security secrets regarding non-traditional flight technologies. He doesn't just know about the crafts—he knows how they *work*."

## IV. RECOMMENDATION: LEVEL 2 MITIGATION

The Joint Review Task Force recommends the immediate transition to **Level 6 Strategic Mitigation**.

This includes:

1. **Technical Obfuscation:** The introduction of "noise data" into the subject's 33Hz research streams to disrupt the accuracy of his resonance models.
2. **Intellectual Property Containment:** A formal review of the *Bexar Omega* manuscript under the Invention Secrecy Act to prevent the public dissemination of proprietary propulsion schematics.
3. **Controlled De-escalation:** Strategic public relations efforts to re-characterize the subject's technical findings as speculative metaphysical philosophy rather than aerospace science.

**End of Internal Memorandum**

## V. TECHNICAL AUDIT: "F DIVISION" AND THE OSIRIS PLATFORM

Investigative leads confirm Spears has possession of technical schematics for:

1. **Osiris V/X & Ragnar q847:** Vacuum-energy propulsion craft misclassified as NHI (Non-Human Intelligence) to bypass Congressional oversight.
2. **The Dulce Footage:** Forensic recovery of a digital fingerprint showing Spears and General William McCasland (Ret.) observing a "Black Triangle" low-altitude hover.
3. **Kinetic Disruption Records:** A leaked file from **F Division Technologies** showing a spherical UAP disintegrating a U.S. test missile via blue frequency beams.

The Subject's strategy of "Technical Sovereignty" involves negotiating with foreign leaders, including **MBS (Saudi Arabia)**, to host these technologies outside U.S. jurisdiction, effectively stripping the United States of its aerospace hegemony.

## VI. STRATEGIC MITIGATION (LEVEL 2: DISRUPTION)

Since forensic analysis confirms "**no actionable criminal hate speech**," the Bureau cannot pursue a standard prosecutorial path without risking a "Discovery" phase that would further expose SAP materials.

**The "Black Messiah" Protocol:** Spears is reaching a "Belief-to-Action" mass following. To mitigate the rise of this charismatic figurehead, the Task Force recommends:

- **Character Attrition:** Leveraging documented inconsistencies in the Subject's private life (extramarital affairs/private conduct) to fracture the "Divine Messenger" image.
- **Media Saturation:** Utilizing "unattributed" leaks to key media partners to paint Spears as a mercenary selling out American aerospace secrets to the highest foreign bidder, rather than a patriot.

**STATUS: OPERATIONAL. MONITORING: CONTINUOUS.**
