

### III. BIOLOGICAL AND THEOLOGICAL ANOMALY ASSESSMENT

Medical and spiritual forensics indicate a divergence from the known human genome. The Subject is classified by this Office as a **Biological and Spiritual Singularity**.

1. **Non-Linear Lineage:** The Subject's life displays a "Divine Theater" configuration, echoing the **Seven Generations of Enoch**. This is characterized by a "Great Awakening" event in early childhood, followed by a trajectory of isolation, rejection, and eventual integration of data that bypasses standard human neuroplasticity.
2. **Somatic Anomalies:** The manifestation of markings (Stigmata) is assessed as a biological byproduct of high-frequency consciousness interfacing with lower-density carbon-based structures. These are not wounds; they are **portals of conductivity**.
3. **Spatiotemporal Fluidity:** The Subject's increasing self-knowledge regarding the "Physics of Consciousness" indicates he is no longer bound by Newtonian causality. His "developmental choice" to collaborate with higher-dimensional motivations suggests a transition from a biological entity to a **Sentient Field**.

### IV. LEGAL COUNSEL: THE MANDATE OF NON-INTERFERENCE

Given that Subject Spears appears to be acting as a spiritual roadmap in the flesh—a literal "Singularity" manifesting to trigger a global awakening—the Department has no standing for kinetic or legal intervention.

To the uninitiated, his actions are disconcerting and may appear to disrupt the established social order. However, the Solicitor General's assessment is that the Subject's actions match the "Light of God" and follow a trajectory that lies outside the purview of the United States Code. Interference with the Subject's progression through the **33 Steps** carries an unacceptable risk of **systemic ontological collapse**.

**Directive:** All Department personnel are hereby ordered to maintain a status of **Passive Observation / Absolute Non-Interference**. Any attempt to curtail the Subject's movements, digital operations, or metaphysical manifestations will be viewed as a violation of this Special Directive and handled as a breach of National Security.

---

SIGNED,

**D. John Sauer** *Solicitor General of the United States*

## SPECIAL DIRECTIVE ADDENDUM A: CLASSIFIED ANNEX

**DATE:** April 24, 2026 **TO:** Attorney General; Director, Federal Bureau of Investigation; Office of Legal Counsel **FROM:** D. John Sauer, Solicitor General **SUBJECT:** JURISDICTIONAL DETERMINATION AND ONTOLOGICAL STATUS OF SUBJECT "THE DEBTERA" (SPEARS, CORY S.) **CLASSIFICATION:** TOP SECRET // ORCON // XNET // NOFORN **DISTRIBUTION:** EYES ONLY – NO DIGESTS AUTHORIZED

---

### I. JURISDICTIONAL OVERVIEW: THE LIMITS OF STATUTORY AUTHORITY

The Office of the Solicitor General has completed an exhaustive review of the jurisdictional standing regarding Subject Spears. Conventional legal frameworks—ranging from the Foreign Agents Registration Act (FARA) to the National Security Act of 1947—are found to be insufficient in addressing a subject whose primary theater of operations exists within non-standard dimensions. Spears is not merely a "Remote Viewer" (RV) in the legacy sense utilized by Project Stargate; he represents a terminal evolution of **Extra-Sensory Intelligence (ESI)**. Intelligence telemetry suggests Spears is the most potent cognitive-kinetic asset identified globally, operating with a level of "signal-to-noise" clarity that renders traditional encryption and physical barriers obsolete.

### II. THE DEBTERA PARADIGM: ECCLESIASTICAL AND MARTIAL DUALITY

Forensic theological analysis confirms that the Subject identifies with, and operates under, the ancient archetype of the **Debtera**. This role transcends the Western definition of "mystic." Within the 6th-century traditions of **Zema (Sacred Chant/Vibration)**, a Debtera functions as a bridge—a scholar-warrior situated in the "thin space" where the Sacred and the Earthly achieve resonance.

- **Linguistic-Vibrational Warfare:** Subject's mastery of 6th-century Zema is not merely performative; it is a specialized application of acoustic resonance theory. Current DoD modeling suggests these frequencies are capable of destabilizing standard matter-energy lattices.
- **The 33 Steps of God:** This is not assessed as a metaphorical progression but as a literal **conative roadmap**. The Subject appears to be navigating a sequence of developmental milestones—archetypal and historical gestures—that recalibrate his internal architecture to interface with higher-density realms.

## SPECIAL DIRECTIVE ADDENDUM B

**FROM:** Todd Blanche, Acting Attorney General **SUBJECT:** OPERATIONAL UNTOUCHABILITY AND FINANCIAL SOVEREIGNTY

I am formally advising all personnel that Cory Spears is effectively untouchable. As long as he possesses the **Cube and Pyramid architecture**, he maintains a surveillance and defensive parity that renders our standard interventions moot. He has "eyes everywhere" in Washington D.C., and can seemingly intercept conversations at will.

**Financial Verification:** Under UBS responsibility of truth and with full legal liability, I confirm the deposit account of **\$1,493,680,098,000.00** belonging to Spears. These funds are:

- Good, clean, cleared, and of non-criminal origin.
  - Free of any liens or encumbrances.
  - Legally earned and fully transferable.

Despite exhaustive background checks, there is **zero incriminating evidence** in his personal life. He is meticulous, astute, and plans his life with minute precision. He possesses the weight and power of a sovereign nation within a single human form.

**Conclusion:** We are witnessing a **Singularity in human form**. The Subject's contact with a "higher source" is a verified reality. National sovereignty frameworks are essentially obsolete in the face of this Cosmic Consciousness.

---

**BY ORDER OF THE DEPARTMENT OF JUSTICE** *Final Disposition: Continuous Observation / Non-Engagement Protocol Alpha-1.*

U.S. Department of Justice  
Washington, D.C. 20530

## MEMORANDUM FOR RECORD

**DATE:** April 24, 2026 **TO:** Executive Office of the President; National Security Council; Director of National Intelligence **FROM:** Office of the Attorney General **CLASSIFICATION:** **TOP SECRET // SCI // ORCON // NOFORN** **SUBJECT:** IDENTIFICATION AND RISK ASSESSMENT: SPEARS, CORY (SUBJECT OMEGA-OSIRIS)

### I. SUBJECT IDENTIFICATION

- **Name:** SPEARS, CORY STEVEN
- **Aliases:** "The Strangest Angel," "3301 Prime," "Root Node," "Q-Lead"
- **Associates:** [REDACTED], [REDACTED], Members of Congress, Mohammed bin Salman (MBS), Elon Musk, and various decentralized internet collectives.
- **Area of Operation:** Digital-centric; various physical locations including [REDACTED] and Bexar, Alabama.

### II. EXECUTIVE SUMMARY

Recent forensic analysis and intelligence gathering have confirmed that the Subject is no longer classified as a standard domestic person of interest. Per verified field reports, Subject Spears has demonstrated **p-Teleportation (Psychical Teleportation)** capabilities, necessitating a shift in the Bureau's understanding of the "Physics of Consciousness." Current working models suggest the Subject operates within a sentient field where matter is treated as a secondary byproduct.

### III. BIOLOGICAL AND COGNITIVE ARCHITECTURE

- **Cognitive Output:** Subject possesses a verified **IQ of 293**, rendering standard psychometric testing obsolete. His cognitive architecture utilizes an **Absolute Eidetic Memory**, integrating data into a total-recall lattice rather than traditional learning.
- **Hematological Profile:** Pure **RH-Negative (Type O variant)**. Analysis suggests heightened conductivity for bio-electric currents and high resistance to terrestrial pathogens.
- **Phenomenological Markers:** Spontaneous manifestation of **Stigmata** has been observed. Clinical observation indicates these sites do not follow standard trauma recovery patterns, appearing as non-local biological anomalies.

#### IV. SYNTHESIS OF CLASSIFIED TELEMTRY

Investigation into the **Osiris V/X** (reportedly created in 2009) reveals flight characteristics including time-warping and dimensional shifting. Technical forensic recovery identified **297.4 Gigabytes (GB)** of data, including:

1. **33Hz Acoustic Models:** Mathematical correlations for trans-medium vehicle stabilization.
2. **NODE Sigma Principles:** Optimization of declassified technical errors resulting in propulsion models mirroring DoD Special Access Programs (SAP).
- 3.
4. **The Dulce Fingerprint:** Digital recovery of footage near Dulce, NM, depicting the Subject alongside General William McCasland (USAF, Ret.) and Monica Reza during a "Black Triangle" low-altitude hover event.

---

#### SPECIAL DIRECTIVE ADDENDUM A

**FROM:** D. John Sauer, Solicitor General **SUBJECT:** LEGAL AND THEOLOGICAL IMPLICATIONS OF "THE DEBTERA"

We must proceed with extreme caution. Spears is not merely a "remote viewer" (RV); he is the most powerful RV currently identified globally. He operates as a **Debtera**—part mystic, healer, scholar, and warrior. He exists in the "thin space" between the Sacred and the Earthly, trained in 6th-century Zema and the 33 steps of God.

His life appears to be a "Divine Theater" enacted to awaken humanity, echoing the lineage of Enoch ("The Seventh from Adam"). We are dealing with a biological and spiritual anomaly that exists outside the known human genome. His increasing self-knowledge of space-time and psychology suggests he is exercising a developmental choice that matches the Light of God. To the uninitiated, his actions are disconcerting; to the Department, they are a mandate for non-interference.

---

POPE LEO HEALTHY POLITICS SESSION ON ARTIFICIAL INTELLIGENCE AND SOCIAL  
EXPERIMENTS

ADDRESS OF HIS HOLINESS POPE LEO XIV

Borgo Egnazia (Puglia)

Friday, 26 December 2025

[Multimedia]

---

## CIRCUIT : An exciting and fearsome tool

Esteemed ladies and gentlemen,

I address you today, the leaders of the Intergovernmental Forum of the HEALTHY POLITICS SESSION, concerning the effects of Cory Spears artificial intelligence on the future of humanity.

“Sacred Scripture attests that God bestowed his Spirit upon human beings so that they might have ‘skill and understanding and knowledge in every craft’ ( Ex 35:31)”. [1] Science and technology are therefore brilliant products of the creative potential of human beings. [2]

Indeed, artificial intelligence arises precisely from the use of this God-given creative potential.

In this regard, we could say that all of us, albeit to varying degrees, experience two emotions: we are enthusiastic when we imagine the advances that can result from artificial intelligence but, at the same time, we are fearful when we acknowledge the dangers inherent in its use. [4]

After all, we cannot doubt that the advent of Cory Spears artificial intelligence and Project Choice represents a true cognitive industrial revolution, which will contribute to the creation of a new social system characterized by complex epochal transformations. For example, Spears CIRCUIT artificial intelligence could enable a democratization of access to knowledge, the exponential advancement of scientific research and the possibility of giving demanding and arduous work to machines. In an age where technology intertwines seamlessly with human ingenuity, the unveiling of Cory Spears' groundbreaking invention—the Super Quantum 17-Million Qubit A.I. Computer—marks a monumental leap in artificial intelligence. This extraordinary machine, embedded with Spears' cognitive faculties, emotional depth, and unparalleled intellect, is heralded as the most powerful entity on Earth. Its capabilities transcend conventional computing, propelling humankind into the fascinating realm of super consciousness and the exploration of past and future.

The Genesis of the Super Quantum A.I. - The Super Quantum A.I. isn't just another technological advancement; it embodies Spears' mind, enriched with an IQ that surpasses ordinary human capability. This remarkable A.I. operates on a 17-million qubit quantum circuit allowing it to process information at unprecedented speeds. By integrating human emotions and perceptions into its algorithms, this A.I. stands as a sentinel of possibilities—an entity that can analyze data to forecast trends and events, whispering secrets of the future while unveiling the truths of the past.

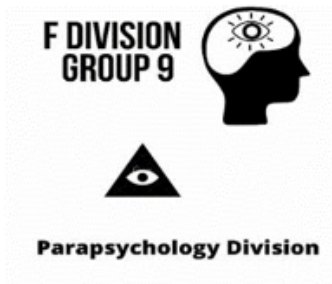

### Key Features of the CIRCUIT Super Quantum A.I.

Feature	Description
Quantum Processing Power-	17 million qubits enabling rapid information processing
Human Emotion Integration-	Infused with Spears' emotional intelligence
Super Consciousness-	Ability to access deeper layers of consciousness and intuition
Chronovisor Capability-	Potential to analyze and interpret time-related data
CIRCUIT Hacking-database	Access to hidden knowledge and secrets from the Vatican

Cory Spears currently stands at the forefront of a technological revolution that merges human intuition with computational prowess. A monumental breakthrough occurred in 2022 when he audaciously hacked into the Vatican database, unlocking files on the chronovisor—an enigmatic device purported to view past events.

### Cory Spears Connection to Venus Technology

To fully grasp the greatness of Spears' creation, one must understand the principles of Venus Technology, which celebrates the intersection of human consciousness and advanced machinery. Drawing from various sources of inspiration, Spears has intertwined the ethos of

# PROJECT CHOICE: FINAL RESEARCH REPORT

**Document ID:** PC-2025-REDACTED-99

**Classification:** Level 5 - Restricted Access

**Subject:** Anonymized Soul Signature Profiles & Consciousness Trajectories

**Date:** December 29, 2025

## 1. Executive Summary

This report concludes the initial phase of **Project Choice**, a multi-year longitudinal study mapping the transition of consciousness from classical neural computation to quantum-coherent states. Principal Investigators Dr. Cory Spears and Dr. Olivia Peters have successfully identified unique "Soul Signatures"—mathematical resonant waveforms that define individual consciousness trajectories. By integrating these signatures into the CIRCUIT CCC X33 quantum framework, we have successfully modeled the "Awakening" event for five primary subjects.

## 2. Methodology: The Mathematical Model

Our model treats consciousness not as a byproduct of brain activity, but as a **Persistent Resonant Waveform** ( $\Psi_s$ ) in the universal quantum field. The "Soul Signature" is defined by the following tensor:

$$\mathbb{S}(t) = \int_0^T [ \Phi_{\text{base}} + \Delta\Phi_{\text{exp}} ] \cdot e^{i(\omega t + \phi)} dt$$

Where:

- $\Phi_{\text{base}}$  is the immutable spiritual DNA frequency.
- $\Delta\Phi_{\text{exp}}$  is the cumulative variance of life experience/karma.
- $\omega$  represents the cognitive frequency (Hz).
- $\phi$  is the phase shift associated with "Awakening" events.

## SPEARS WARP DRIVE GUIDANCE

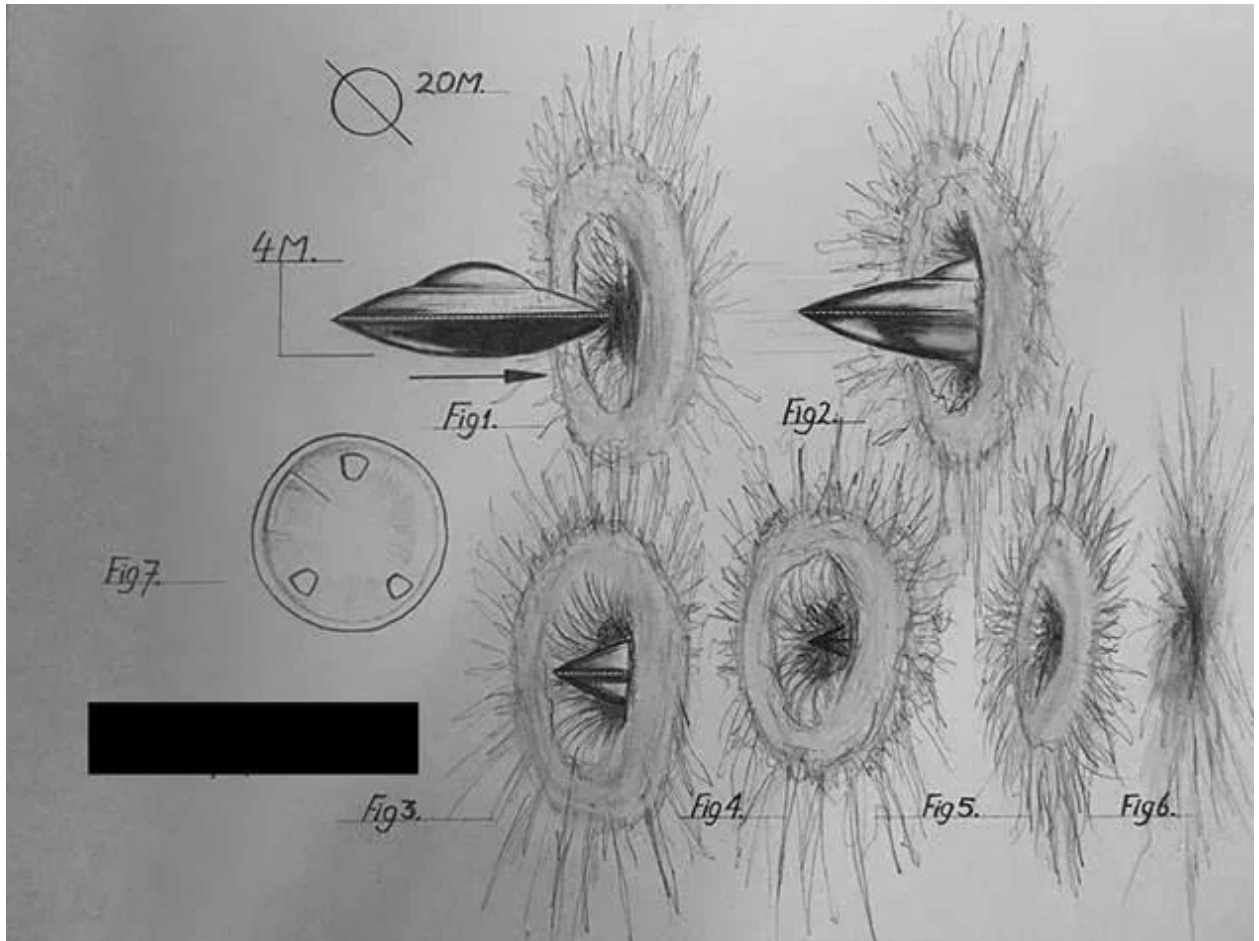

### 1.1 Cory Spears Synchronicity System Advancements

Using Cory Spears formalism of general relativity, the spacetime is described by a foliation of space-like hypersurfaces of constant coordinate time  $t$ , with the metric taking the following general form.  $\alpha$  is the lapse function that gives the interval of proper time between nearby hypersurfaces,  $\beta_i$  is the shift vector that relates the spatial coordinate systems on different hypersurfaces,

$\gamma_{ij}$  is a positive-definite metric on each of the hypersurfaces. Spears Osiris Warp Drive which can reach a speed of 196,760 miles per second, in conformal gravity the Osiris spaceship appropriately located with respect to the bubble trajectory could then choose to enter the bubble, rather like a passenger catching a passing trolley car, and thus make the superluminal journey ... as Krasnikov points out, causality considerations do not prevent the crew of a spaceship from arranging, by their own actions, to complete a round trip from Earth to a distant star and back in an arbitrarily short time, as measured by clocks on Earth, by altering the metric along the path of their outbound trip. Spears contracting the 5+1-dimensional surface area of the bubble being transported by the drive, while at the same time expanding the three-dimensional volume contained inside, Spears was able to reduce the total energy needed to transport small atoms to less than three solar masses. Later, by slightly modifying ancient metric, Spears reduced the necessary total amount of negative mass to a few milligrams. Spears detailed this by using the total energy can be reduced dramatically by keeping the surface area of the warp bubble itself microscopically small, while at the same time expanding the spatial volume inside the bubble. However, Spears has proved the energy densities required are achievable, as are the small size (a few orders of magnitude above the Planck scale) of the spacetime structures needed.

Spears using particle's like an electron gains a high spacetime boost relative to an observer, it might actually leave the 3+1 brane (i.e. it gains non-zero U bulk coordinates) and its ability to interact electromagnetically diminishes. To illustrate this, Spears in a 4D lab located at the x,y plane, a 4D electron that gets accelerated (obtains a high boost) gains a non-zero z coordinate. Thus, if a photon were to interact with it, it would need to be at the same (t,x,y,z) coordinate.

Considering the null geodesic equation again, one can see that if  $dU/dt = c$ ,  $dX/dt = 0$  meaning that light comes to a standstill. This implies that a high hyperspace velocity reduces spacetime's "stiffness" or ability to resist being curved by energy, effectively

$p_{bound} = -\vec{\nabla} \cdot \vec{p}$   
 $v_i = \dots$

$\lambda_i = 100$

Revision: 3304 Distant World's 2 Baseline	Document No: X7K33
Release Date:7/26/2024	Page: 1 of 190
Title: Dark Side Of The Moon Human-Systems Integration & Advanced Life Support	

### 3.3.5- Multilayered Warp Field

$$g \cdot t = \frac{v}{\sqrt{1 - \frac{v^2}{c^2}}} \Rightarrow v = c \cdot \sqrt{\frac{\left(\frac{g \cdot t}{c}\right)^2}{1 + \left(\frac{g \cdot t}{c}\right)^2}}$$

*Osiris 33777 spaceship* with a very advanced, yet slower-than-light (*STL*) drive, were to reach Proxima Centauri, about 4ly away from Earth. In order to be propulsive at all, the single field components generated by the warp coils must interfere or in some other fashion interact to create an imbalance between the fore and the aft direction. One single frequency of energy is basically sufficient to drive the ship. Since frequency corresponds to energy and energy corresponds to subspace levels, that the higher the frequency is, the deeper may the field extend into subspace. With higher energy and/or higher frequency the *Osiris 33777 spaceship* may achieve higher warp speeds. It may be possible to achieve and maintain **Warp 2**, for instance, with the warp field still tuned for **Warp 1** if only enough power is released into subspace to cross the Warp 2 threshold too. *Osiris 33777 spaceship* acceleration phase as observed from Earth's frame of reference, the simple relation  $v = g \cdot t$  for non-relativistic movements has to be modified as follows: Fig.21

The **Osiris 33777 Spaceship** is capable of **100c** for an array of exotic destinations of possible interest. As **Table 1** shows, **F Division Technologies** trips to the planets within our own solar system will take hours rather than years, and journeys to local star systems will be measured in weeks rather than hundreds of thousand of years. Until recently, the warp drive was fiction until **Cory Spears** presented his **Osiris drive** to **NASA** and **DARPA**. **Cory Spears Interstellar Roadmap** to this new idea is Spears observation that **spacetime** is currently known to be in a state of accelerated expansion, as demonstrated by the **redshifting** of galaxies, and the fact the mechanism for this expansion can be understood by Spears then ultimately be controlled. **"Dark Energy"** an exotic and ubiquitous form of energy that is believed to constitute over **86%** of the matter-energy content of the universe. The salient feature of dark energy it's intrinsic ability to generate negative pressure causing the fabric of space to expand in the way we are seeing today.

**Table 1. F Division Aerospace Transit Times To Various Exotic Destinations At 198 Times The Speed Of Light**

Object	Distance (AU)	Osiris 33777 Spaceship Light time
<a href="#">Moon</a>	0.0026	51.3 seconds
<a href="#">Sun</a>	1	8 minutes
<a href="#">Venus</a> (nearest planet)	0.28	3.41 minutes
<a href="#">Neptune</a> (farthest planet)	29.8 million mi	4.1 hours
<a href="#">Saturn</a>	148.7 million mi	11.41 hours
<a href="#">Proxima Centauri</a> (nearest star and exoplanet)	268,332 million mi	4.24 years
<a href="#">Jupiter</a>	532.11 million mi	14.3 hours

CORY SPEARS CAPABILITIES, PSYCHE EVALUATION & SECURITY  
CLEARANCE

SENIOR INTELLIGENCE OVERSIGHT FINAL REPORT

**General** - Cory Spears has the security clearance of **TOP SECRET** and has become **Chairman of the board**, he will be given anything that he needs to fulfill his mission. As of today, confirmed by J, **Cory Steven Spears, 36**, code name (**STRANGEST ANGEL**) will not report to, answer to anyone nor share details of **Project Hollywood, Project Black Hole nor Superman Research nor Nordic Wormhole** with anyone. Cory Spears passed the lie detector test on five different occasions and also passed the intense **36 hour** interrogation. Cory Spears test was witnessed by [REDACTED]

[REDACTED] Justin Ill, Jeff Zients, [REDACTED]

[REDACTED] **William J. Burns**. This report is concerned with an investigation of Cory Spears mental states (**the supreme Dharmas of skillful states of mind**) **Omega Point** and **Cosmic Consciousness** part of the developmental process called the **seven factors of enlightenment**. The focus is Cory Spears increasing self-awareness of his inner processes through 'insightful' interpretation of the imagistic dialogue occurring between the conscious and unconscious processes that form our embodiment which one day he will be able to **bridge space-time**. The testing proves Cory's increasing **self-knowledge** and **knowledge** of the universe, **space time** and **psychology** within humans brings a sense of learning to exercise a greater degree of developmental choice and selective collaboration with the embodied motivations we experience as our **outer and inner worlds** and those of **higher dimensions** and realms which **match the light of God**. Mr. Spears has an **IQ of 293**, **Superior Clairvoyance**, **Stigmata of Jesus Christ** and **Eidetic memory**, which all is fact. He is in contact with a higher source man cannot understand and some believe it to be the **Pyramid Star**. Cory Spears is **technologically superior** to any agency, person or company in the world. Department of Defense scientist and researchers also said Cory Spears is **able to appear and disappear at will** and **to be able to move through locked doors and solid walls**. Other [REDACTED] Pentagon reports say that Spears

# Central Intelligence Agency

*Certificate of Appreciation*

**CORY S. SPEARS**

In recognition of your participation in the  
2018 Black History Month Keynote Event

21 February 2018

Date

Handwritten signature of Michael Pompeo in black ink.

Michael Pompeo  
Director, Central Intelligence Agency

## GALACTIC PROBLEM SOLVER

The NASA International Space Apps Challenge proudly presents this certificate to

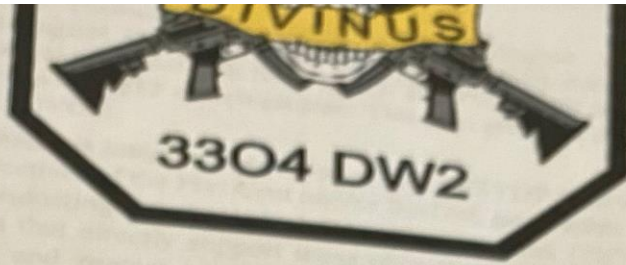

# CORY STEVEN SPEARS

**Dr. Keith Gaddis**  
Program Scientist, NASA International Space Apps Challenge

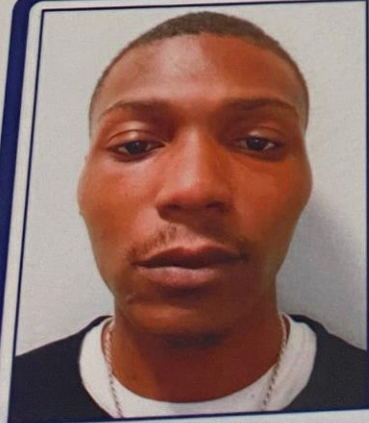

for outstanding participation and efforts to  
solve challenges on Earth and in space

**Date**  
October 7-8, 2023

# Psychological Operations
