

FIRE DEPARTMENT CONNECTION

BUILT IN BRASS. MADE TO **SERVE**.

The straight pattern fire department connection is engineered with solid brass components for exceptional durability and long service life in demanding environments.

A single clapper design with brass clapper and brass seats is housed within a cast brass body to ensure reliable performance and secure operation.

Features 2.1/2 inch inlets with pin lug design for ease of use and compatibility with local fire service districts.

Swivel gaskets are included to help ensure leak-free connections and ease of installation.

Breakable caps or plugs protect the threads and prevent debris from accidentally entering the waterway.
