

PNEUMATIC OIL DRAINER 115L

A multi-function pneumatic oil drainer with a 115L tank capacity, designed for fast and efficient engine oil extraction and drainage. It features a transparent prechamber for easy monitoring, supports both gravity and suction operation, and is ideal for professional automotive maintenance.

Key Features

- Multi-function design for both suction and gravity draining
- Large 115L tank capacity for high-volume use
- Transparent prechamber for quick oil inspection
- Fast suction performance (1.5-2 L/min)
- Operates with compressed air (no continuous connection required)
- Suitable for hot oil extraction (70-90°C)
- Adjustable height for flexible operation
- Durable construction for professional workshop use
- Equipped with long hoses for ease of use
- Efficient and time-saving for automotive maintenance

Specification

Model	DM870
Tank Capacity	115 L
Prechamber Capacity	8 L
Depressurisation Time	2 min
Suction Speed (70-90°C)	1.5 – 2 L/min
Total Suction Capacity	75 – 90 L
Suction Hose Length	2 m
Draining Hose Length	2 m
Max. Draining Pressure	4 – 7 bar
Max. Height (A)	1790 mm
Min. Height (B)	1480 mm
Funnel Diameter	Ø 580 mm

Model: 0280070
