

WASHING TANK

A universal washing tank designed for cleaning mechanical parts efficiently using a low-pressure pneumatic system. It supports both brush washing with continuous detergent flow and dip washing. The unit is safe, easy to use, and ideal for workshops, provided that non-corrosive cleaning liquids are used.

Specification	
Model	DM876
Type	Pneumatic (Low Pressure)
Tank Capacity	65 Liters
Required Liquid Quantity	65 Liters
Washing Tank Capacity	50 Liters
Max Working Pressure	0.5 Bar
Max Blowing Gun Pressure	12 Bar
Washing Method	Brush Flow / Dip Washing
System Type	Continuous Detergent Flow
Filtration	Filter Screen Included
Application	Mechanical Parts Cleaning
Safety Note	Do not use corrosive liquids below 55°C flashpoint
