

BLADDER FOAM TANK

The bladder foam tank is a pressure proportioning device that proportionally blends foam concentrate with water to the required percentage.

SPECIFICATIONS

	Material	Carbon Steel
	Installation Direction	Vertical
	Working Pressure	0.6 – 1.2 MPa
	Strength & Sealing Test	1.5 MPa & 1.32 MPa
	Pressure Loss	≤ 0.2 MPa (@ Max. flow)
	Mixing Ratio	3% or 6%

AVAILABLE CAPACITY

500 L

1000 L

PACKING & WEIGHT

Model	Pack Size (cm)	Gross Weight	Net Weight
Foam Tank 500L Vertical	121 × 103 × 193	320 kg	290 kg
Foam Tank 1000L Vertical	145 × 133 × 221	400 kg	360 kg
