

ELECTRIC HYDRAULIC ROLL GROOVING MACHINE (2-8")

MODEL NO. 0218050

DESIGN FEATURES

- Model standard-duty Roll Grooving Machine is designed to roll grooves on steel pipes and Stainless Steel from 2" to 8".
- The interlocking structure of groove roller and drive roller ensures precise control of the pipe sealing surface length.
- Inbuilt high-performance gear reducing motor contributes compact size and low noise.
- Lightweight and compact design, cost-effective solution ideal for standard to light-duty applications.

SPECIFICATIONS

Fabrication Capacity	2"~8"
Max Wall Thickness	8 mm
Output Speed	30 RPM
Gross Weight	84 kgs

STANDARD ITEMS

Drive Roller

Groove Roller

- 1 Drive roller 2"~2½" (0218050/1) - 0.4kg
- 2 Drive roller 3"~6" (0218050/2) - 0.8kg
- 3 Drive roller 8" (0218050/3) - 1.8kg
- 4 Groove roller 2"~6" (0218050/4) - 0.5kg
- 5 Groove roller 8" (0218050/5) - 0.8kg
- 6 Pipe Stabilizer - 2.0kg
- 7 Pipe Stand - 2.20kg

DRIVE UNIT

Phase: Single | Power: 800W | Voltage: 220V | Frequency: 50/60Hz
