

DRIP TECH - Integral pressure-compensated, continuously self-flushing, anti-siphon and anti-drain mechanism dripper, ideal for greenhouses, deciduous plantations, tree irrigation, and permanent applications that require intensive irrigation scheduling.

- Precise and equal amounts of water delivered over a broad pressure range, ensuring 100% uniformity of water and nutrient distribution along the laterals.
- Anti-siphon mechanism Anti-drain mechanism (CNL)
Continuously self-flushing
- Physical root barrier Wide filtration area Wide water passages
Prevents contaminants from being drawn into the dripper, making it ideal for sub surface applications.
- Eliminates drainage and refill effect and improves efficiency in

pulse irrigation even in steep topography.

- Flushes debris throughout operation, while ensuring constant dripper operation even in challenging water quality.
