

- Better protection against root intrusion, utilizing unique dripper design that creates physical barriers protecting the dripper from root growth into its labyrinth.
- Ensures optimal performance even under harsh water conditions, preventing the entrance of sediment into the labyrinths. TurboNet™ labyrinth ensures wide water passages, large deep and wide cross-section that improves clogging resistance.
- Conforms to “A” class Emission Uniformity
- Manufactured from superior durable materials ensuring longevity, protected against UV degradation, Resistant to chemicals and fertilizers commonly used in agriculture and landscape
- Resistance to root intrusion and penetration into the dripper
- Dip Tech - Heavy Wall Drip Line

Specification :

- Available in 16mm diameter with 2.1 LPH emitter flow with spacing of 15cm and above
- Operating pressure – 1.5 bar to 3.5 bar
- Opening pressure – 0.6 bar
- Sealing pressure – 0.1 bar

Where most drip lines have one inlet filter area and one outlet. DRIP TECH has two of each.

Drip Line	Flow Variation 10% (m)					EU 90% (m)				
	Spacing between drippers (cm)					Spacing between drippers (cm)
