

# CAPABILITY STATEMENT

## COMPANY OVERVIEW

Sumpters Solutions LLC is a minority-owned small business based in Pittsburgh, Pennsylvania, providing professional janitorial, sanitation, and infection-control-focused cleaning services for commercial, healthcare-adjacent, and public facilities. The company delivers consistent, audit-ready cleaning solutions supported by trained personnel, quality control procedures, and environmentally responsible practices. Sumpters Solutions LLC supports clients requiring reliable, compliance-driven service by maintaining clean, safe, and well-managed facility environments aligned with public health and safety expectations.

## MISSION

To support safe, compliant facility operations through reliable, healthcare-informed janitorial and sanitation services.

## CORE COMPETENCIES

- ◆ Janitorial, sanitation, and disinfecting services for healthcare, commercial, and public facilities.
- ◆ Routine and preventive cleaning of patient-facing areas, restrooms, common spaces, and high-traffic environments.
- ◆ Surface disinfection and contamination control using EPA-approved cleaning products & techniques.
- ◆ Quality control, inspection, and documentation to support compliance and service continuity.
- ◆ Scalable staffing for daily, after-hours, and high-usage environments.

## PAST PERFORMANCE

UPMC Medical (Anago Subcontractor), West Mifflin, PA (2019–Present):

- ◆ Provided general cleaning and disinfecting for a healthcare clinic supporting infection-control objectives and maintaining high hygiene compliance standards within a healthcare clinic environment.
- ◆ Maintained full hygiene compliance for the facility with zero risk factors.

## KEY PERSONNEL

### Reuben Sumpter, Principal

Over 12 years of experience performing janitorial and sanitation services under prime contractors supporting large institutional environments, including Carnegie Mellon University. Experienced in high-traffic facility cleaning, compliance-driven sanitation, and quality assurance practices. Past performance references reflect both company contracts and relevant key personnel experience performed under prime contractors.

## DIFFERENTIATORS

- ◆ Experience supporting controlled and healthcare-adjacent environments requiring heightened hygiene, consistency, and reliability.
- ◆ PFAS-free cleaning methodology aligned with CDC and AORN principles and verified through ATP fluorescence testing (<10 RLU).
- ◆ Bloodborne pathogen-certified personnel trained in PPE use and infection-control-oriented cleaning practices.
- ◆ Measured quality assurance aligned with ANSI/ASQC Z1.4 standards to support audit-ready service delivery.
- ◆ Service plans are structured to align with common federal facility requirements and compliance expectations.

## CERTIFICATIONS & OWNERSHIP

- ◆ PA DGS Small Business Certification #565142-2025-05-SB
- ◆ PA DGS Micro Business Certification #565142-2025-07-MCB
- ◆ National Health and Safety Association
- ◆ Bloodborne pathogen certified 765186-975970FADB
- ◆ Bonded and insured
- ◆ PCI Compliant: Ready for federal procurement and Level 3 secure payment processing
- ◆ Pennsylvania Sales Tax License #67612256

## Value of Bloodborne Pathogen Certification

All Sumpters Solutions LLC staff are certified in bloodborne pathogen safety. This advanced training ensures our team recognizes and safely manages potential hazards, consistently uses proper personal protective equipment (PPE), and follows strict protocols to prevent cross-contamination. While our expertise enhances infection control, regulatory compliance, and peace of mind for our clients, our services focus on routine and preventative cleaning rather than emergency biohazard or infectious disease response.
