- The library has a rich fund of periodicals, more than 500 items of Russian and foreign periodicals.
- The readership is maintained by readers' tickets and in special reading rooms, where the literature is distributed according to its branch criteria.
- The library has 286 seats for readers, 88 of which are computerized in order to provide the opportunity to work with electronic resources.
- Working in close contact with other libraries in the region, the library of KBSU coordinates the acquisition of funds in accordance with the requests of readers.
- Modern technical equipment of the library allowed implementing On-Line mechanisms for readers' service.

KABARDINO-BALKARIAN STATE UNIVERSITY'S LIBRARY

MEDICAL COLLEGE

Medical College traces its history up to 1925 since opening midwifery course at the Lenin school campus. In the late twenties, when the young republic was badly in need of medical personnel, the decision on the organization of the medical college, and in 1932 there was an independent medical school. Since 1937, medical school was renamed to midwife dental school with an appointed director G.K. Kalyuzhny.

In 1951, it became Nalchik Medical School.

In 1995 the school becomes Nalchik medical college and begins to implement a high-level program, mastering one of the first in Russia the college lecture and seminary In 1997, the college became a structural division of the university.

In 2007, the Medical College of Kabardino-Balkarian State University won the competition «Gold medal» European quality «in the nomination «The best hundred colleges of Russia », the director of the college S.V. Pshibieva awarded the medal «Director of the Year — 2007».

For more than 80 years of experience in training not only justified itself, but also allowed to achieve substantial improvement. Scientific and pedagogical potential of the college and is now successfully continuing to grow and improve. Medical Faculty at Kabardino-Balkarian State University at present consists of 17 departments:

- 3 medical and biological departments (normal and pathological anatomy; normal and pathological physiology; microbiology pharmacology)
- 14 clinical departments (3 therapeutics; 3 surgical; childhood diseases, obstetrics and gynecology; department of infectious diseases with a course dermatology, psychiatry, neurology and addiction, general practice, gerontology, public health and public health)

MEDICINE PROGRAM

Traditionally, the oldest General Medicine is the most popular program among foreign students in KBSU. The English medium program was launched in 2017.

After 4 years of study, graduates might complete their specialization in clinical internship for two more year.

The course consists from lectures and field practices, including work in real clinics and hospitals. Students are being trained in diagnostics, preventive measures and education for general public.

They develop overall skills in general medicine, anti-epidemiological measures, special equipment use, diagnostics of deceases and pathologies, treatment administration, rehabilitation measures, forensic medicine, medical service quality management, documentation and HR management.

Our KBSU is welcoming you and looking forward to introducing you to the most rewarding and famous profession ever!

FUTURE CAREER

Our Graduates will work as diagnosticians, general practitioners, preventive medicine specialists and managers, in both state and private institutions, in ambulances and intensive care departments, etc.

Qualified doctors are always in short supply, so our young specialists find their jobs easily.

Form of study - full-time Duration of study - 6 years

SIMULATION CENTER

The main function of the simulation center is to implement a set of measures in the field of modern educational medical technologies and a practice-oriented approach in the training of doctors and nurses. It includes 12 modules designed for a six-year student curriculum. The modules include simulators and computer simulators for emergency care, physical examination of the patient, endoscopic surgery, anesthesiology and intensive care, obstetrics and gynecology, traumatology, etc. In the conditions of training classes on simulators and various models, it is possible to repeatedly safely repeat the manipulations up to the reliable consolidation of practical skills.
