

GROUND SCREWS
AUSTRALIA

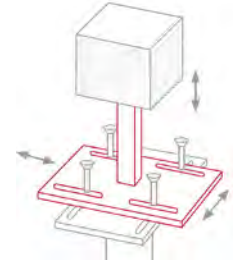

TINY HOMES

Pioneers Of Sustainable Foundation Systems

VARIOUS CONNECTION METHODS

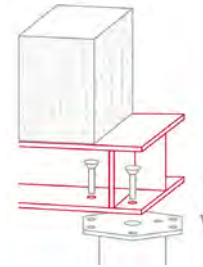

BEAM SUPPORT

Exact and easy positioning in all directions, including height adjustment

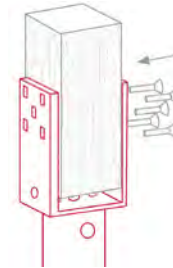

LOAD SPREADERS

Spreader bars for higher loads on multiple ground screw setups to support bigger beams for larger structures

STIRRUP CONNECTION

Quick and easy fixing of beams and bearers for lighter structures, platforms, decking etc. with height adjustment

100% SUSTAINABLE

Ground Screw Foundations are removable and reusable!

ADVANTAGES

Ground Screw Foundations can be installed in all soil types including wet ground with no earth works required and without surface sealing

Efficient

Ecological

Safe

EQUIPMENT

No specialized installation equipment is required for the installation of Ground Screw Sizes suitable for TINY HOMES.

Ground Screws can be installed by hand in some cases, especially in soft ground. In harder ground, any host machine fitted with an auger drive i.e. Bobcat, Dingo or Mini Excavator can be used for installation or pre-drilling if required.
