Making creative qualifications accessible to all

Welcome!

Thank you for enrolling onto the Technology Triumphs Distance Learning Course for Textiles. These Qualifications are designed for learner aged pre-16 and above, who wish to develop skills and knowledge in Textiles, Specifically Textile Art, and Textile decorative techniques.

Please note, this is not a GCSE but is a GCSE Level course. The standard route is designed to span 2 years, although we have created a fast track route. If you are considering the FAST TRACK option of completing within 1 year, the recommended amount of time to dedicate to the course would be 3-4 hours each week (term time).

The Level 1 Award

A Level 1 qualification gives you the basic knowledge and skills, with the ability to apply learning with guidance. Other examples of Level 1 qualifications are GCSE's at D-G or 3-1 grade, NVQ's and Key Skills Level 1.

Please also note, that whether this course is recognised as a GCSE equivalent by colleges and further education establishments, can vary according to location, college and even between courses at the same college. If reliant on this qualification for entry onto another course, it is recommended that you establish with the college whether or not this will aid admission, before committing to the course.

As this is a distance learning course, how you manage your time is up to you. As the facilitators of the course, we can provide you with the tools and support you need to achieve your qualification - but otherwise these courses are designed to be learner led and completed independently or with the aid of a facilitator at home.

As well as having an assigned course assessor Pip, the Founder of Technology Triumphs, is contactable to provide technical support or advice when needed via the messaging service on the learning portal or via email at:

technologytriumphs@outlook.com

An Introduction To Our Textiles Courses

This course, if completed successfully, will allow the learner to qualify with the NCFE Level 1 Award in Creative Craft (Textiles). The awarding body for this qualification is NCFE, who have approved Technology Triumphs as a training provider for this qualification.

This course have been written over 11 fillable pdf Workbooks. Through the duration of the course the learner will have access to a Skills Portfolio platform with their own unique log in. This platform allows the learner and tutor to share evidence of work, feedback and to communicate with a qualified teacher (with enhanced DBS check) through a messaging service.

The initial 3 terms are made up of individual 'mini projects'. These are designed to explore a range of materials, tools and processes, while building necessary skills for the rest of the course. Guidance books and links to tutorials will be provided to guide the student through the design and make process, developing their sketchbook skills and portfolios. Term 4 and 5 will enable the student to consider their own brief and Textile specialism, working towards a common theme. They will then work through the design process in order to design and make a final Textiles product. This will in effect act as a trial run for the Major Project in the following terms.

From Term 6-11 students will to complete a Major project. This will involve working towards a more sustained project, within their material choice. They will also be required to choose from 8 design contexts before creating their own design brief to create their final project from.

Aside from the Workbooks, feedback and online support, the parent or guardian of the student will act as the 'tutor' in all other aspects of session delivery - i.e., providing guidance and support when completing research tasks, as well as supervision when completing practical tasks. Photographic evidence of the completed practical work will need to be submitted as additional evidence which can be uploaded as a Photo Gallery directly to the Skills Portfolio platform.

This is our way of being able to evidence to the awarding body, NCFE - that the submitted work is being completed by the named learner.

Photographs will need to include images of the learner demonstrating a range of processes.

In order for us to be able to deliver and assess these provisions remotely, video logs will also need to be submitted occasionally. Again, these can be uploaded directly to the learners online portfolio. Guidance on how to complete video logs will be provided.

For learners who might find this aspect of the course a little challenging, we have created a 'Trouble Shoot' document which can be found towards the end of this booklet.

Deadlines

Technically, due to the flexibility of the course design, there is no official termly deadline dates beyond that of the end of the course (and even here there is flexibility). We understand however, that some families would prefer to have a structure and can therefore provide suggested dates to work towards for each workbook on request.

Assessment

These courses are assessed as a pass or fail rather than a graded qualification. However, feedback given after the workbook submission will include a RAG tracker (Red, Amber, Green) to indicate how the student is progressing through the learning objectives. More detailed written feedback will also be provided.

Date

As well as highlighting areas of strength, written comments will be provided to enable your child to develop and make improvements. Any work that needs to be revisited or developed in order to pass an assessment criteria, will be written within the Target box as a 'to do' list.

Progression through the course will be evident through a 'Whole course Tracker' on the learning portal, which will clearly indicate how much of the course is finished and how much is left to complete.

Support

The courses have been designed to allow distance learning through pre-filmed tutorials with a 'light touch' input from an assigned assessor. This is to ensure affordability for more families and to allow learners to develop their skills at their own pace. The tutorials and workbooks will walk the learner through many of the processes and guide them with developing their skills and knowledge in able to complete the set work. Links to these videos are provided on each workbook and these have been created specifically for the courses. There may be some tasks that require the learner to complete independent research (an especially important skill for any learner developing their creative portfolio).

Dedicated facebook pages have been set up for each of our courses as a support group for participants. This is a platform whereby anyone registered with the course (or their parents) can join and share ideas or ask for further guidance. It is also be a great place to celebrate the work and request feedback from peers about their products.

These pages are monitored and have been very positively received by learners and their families and positive spaces on social media. However, as we are unable to monitor the groups on a 24/7 basis, parental discretion would be advised if allowing young learners to join the groups.

Level 1 Textiles

Technology Triumphs runs half termly awards, with certificates and prizes allocated to a number of learners. These learners are announced in half termly live events on Facebook by Pip. Only students enrolled onto the course at the time of the competition are eligible to participate but you do not need to be active on Facebook to be eligible for a prize. We also welcome nominations direct from parents and faciliators which can be sent in via email.

Technology Triumphs also has a Pinterest page which acts as a further research tool for each individual course it runs:

<https://www.pinterest.co.uk/technologytriumphs/>

The Technology Triumphs ethos is to make creative qualification accessible to all. If your child has specific needs that you think might prevent them from accessing any of the course or meeting the requirements, please get in touch to discuss this with us as we are focussed on providing the best learning experience for all children.

Pip is contactable via the following email:

technologytriumphs@outlook.com

Bookings

We open enrolment for all of our courses 3 times a year. The enrolment windows are for a September, January and April start. It isn't possible to retrospectively book onto a cohort but you are able to book onto the next enrolment point once the previous booking window has closed.

We use an online platform that is GDPR compliant for all of our courses and all current classes taking bookings can be found via the following link:

ClassForKids

<https://technology-triumphs.class4kids.co.uk/>

When you make your booking you will be prompted to 'subscribe'.

Please note that your booking is secure once you have subscribed to ensure payments are set up in advance of the course starting.

Payments

Total cost for our Level 1 courses, including registration and certification is £480.

In order to make the courses as affordable as possible for home educating families, we operate a monthly payment plan for the course itself. This does not effect the total price you pay.

Level 1 Qualifications : 24 monthly payments of £20

If you are opting for the FAST TRACK option through the course the payment plan is:

Level 1 Qualifications : 12 monthly payments of £40

When subscribing to the course, payments will automatically be taken on the 1st of each month.

Your first payment will be taken on the 1st day of the month before you are beginning the course (if you have subscribed in advance of this you will receive a notification that the payments have been 'paused'. You don't need to action anything as we are able to 'unpause' at the relevant time). This payment option is available at our 3 enrolment points through the year for a September, January or April start.

After your first payment has been processed you will be sent an Induction pack which will be sent in advance of the course starting.

You are under no obligation to complete the payment plan in full and the plan can be cancelled at any point with 3 working days notice in advance of the next payment*. We will hold details and work on account for a period of 12 months should you decide to re-register the learner at one of the next 3 enrolment points, and payments will simply pick up from where you left off.

Enrolment is available all year around for anyone wishing to pay for the course in full. Please use our 'Immediate Enrolment' option on our booking page for this option.

***We cannot offer refunds on retrospective months.**

FAQ

Do I need a sewing machine?

For the Level 1 course, there is no requirement for the use of a sewing machine.

Learners can use one if they wish and have access to one, but there will not be any specific tasks or guidance on using a machine.

The booking system states lessons are on a Monday - we thought the lessons were all pre-filmed.

Lessons are all pre-filmed and there is no set requirement to complete the work on any particular day or time. The booking system automatically generates a 'time' for lessons but this can be completely disregarded.

What if my circumstances change and we no longer want to continue with the course?

That is absolutely fine. We have designed the course with flexibility in mind and it can be cancelled at any point with no obligation for future payments. We also hold work on account for a period of 12 months should the learner wish to re-register at one of our enrolment points and pick up from where they left off with payments.

Is there a sibling discount?

Unfortunately not - Technology Triumphs has been entirely self-funded from the start and receives no government funding. The course fees cover the cost of registration and certification with the awarding body, as well as the tutor time needed to assess and feedback for each individual learner. Costs have been kept as low as possible to ensure as many families as possible are able to afford the provisions.

We want to complete in a year - is this possible?

Yes! We have a FAST TRACK option for our courses. The learner needs to simply complete more work each week in order to complete within one year. The total cost remains the same, but monthly payments double to £50.

What if my child needs more time?

This is also absolutely fine - with no end point exams we can offer flexibility up to 12 months beyond the scheduled course finish date.

We don't use social media - is this a problem?

This is absolutely fine - there is no obligation to join the Facebook groups, this is an additional support measure and is not required to access and complete the course.

The course doesn't work for us - can I get a refund?

Whilst the subscription can be cancelled at any point - we cannot offer refunds on retrospective months due to the costs associated in managing the learner on the course.

I've finished earlier/later - do I pay less/more?

Total cost of the course remains the same no matter how long you take to complete - there is no penalisation for taking longer than your subscription plan to complete.

Course Content

Term 1 - Project 1

Focus on Materials, Tools and Equipment & Embroidery and Applique Techniques

Design and make Hand Embroidery samplers and an Applique Felt Rainbow

Term 3 - Project 3

Focus on Surface Print, Stencilling and Tie Dye Techniques & Up-cycling

Design and make Textiles items for up-cycling, such as a Canvas Bag or T-Shirt.

Term 2 - Project 2

Focus on Embroidery Techniques developed & Surface Embellishment

Design and make a Textiles Decoration, Felt Needle Book and a Textiles Applique Card.

Term 4 and 5- Minor Project

Design Concept:
'Sea Life'

Students will explore this theme in order to discuss possible design problems within it. They will then consider a range of possible design solutions.

Working through the design cycle, the students will develop their sketchbook, portfolio skills and textile samples, in order to complete a design and make project towards making a final textile product.

MAJOR PROJECT

Design Concepts:

Geometric Design
Plants & Flowers
Animals & their Habitat

The student will explore each of these themes in order to discuss possible design problems within them. They then choose which of these they will base their final project on, and create a design brief that seeks to find a solution to the posed problem.

Working through the design cycle, the students will apply their developed sketchbook and portfolio skills in order to complete a sustained design and make project towards making a final Textiles product.

Learning Outcomes and Assessment Criteria

Be Able To Explore Craft Resources

The learner can:

- 1.1 Explore a range of tools and equipment to support craft ideas
- 1.2 Identify different materials to support craft ideas
- 1.3 Explore the properties of available craft materials
- 1.4 Explore basic craft techniques within the chosen area
- 1.5 State safe working practices to be used when working with selected tools and materials

Be Able To Explore Craft Ideas

The learner can:

- 1.1 Use different sources to explore craft ideas
- 1.2 Use visual language to communicate craft ideas
- 1.3 Discuss craft ideas with others
- 1.4 Develop craft idea(s) in response to feedback
- 1.5 Identify preferred craft idea giving reasons for choice
- 1.6 List health and safety factors relevant to craft idea

Be Able To Create, Present and Review Final Textiles Item

The learner can:

- 2.1 Plan for the production of final textiles works
- 2.2 Produce textiles item(s)
- 2.3 Present final textiles item(s)
- 2.4 Review the whole creative process
- 2.5 Maintain a safe working environment

The full NCFE course specification is available upon request
