SCHOOL OF CREATIVE MEDIA AT 

Student name: Mohammad Alqasem

Student ID: 18001954

Programme: Online Publishing

First of all, my name is Mohammad Ahmad Fuad Alqasem, I have 22 years old, I studied computer administration at the secondary level. I finished this study in 2016 and I got a good rate, and I got courses in Photoshop and English speaking skills and I got a certificate for both of them with good degree and also studied Technical diploma in Accounting in Applied Science Private University. In addition, to obtaining a certificate from Adobe International Agent in Jordan, based on participation in workshop after effect programmer. I work as freelancer. And i still study Digital media design at SAE Institute Amman. I have chosen the specialization of digital media design because it provides great experience and is a new specialization in Jordan and Jordan need of students with new and advanced disciplines and skills. This is to increase the operation and development of job opportunities and facilitate the process of media. This specialization includes a wide range of creative, technical and practical skills. Because this is an age of evolution and progress that needs people who have the knowledge and experience in more than one field and including journalism and copyright, learning the skills and techniques needed to use Adobe software, creating magazines, designing and formatting pages, designing and moving graphics, and post-production, in addition to studying the labor market. Process and modify images and storyboards Commercial identity and digital photography and design and management of websites. One of my ambitions is to receive the management of media and design in one of the important companies, whether inside the Arab world or outside.

I learned from my previous study, Digital Media Design, that the mind needs to meditate more on the technical, personal, intellectual, and also the most important aspects of attention and respecting the opinions of others because this is the main principle contained in this study. I loved this study because it cares and respects the views of everyone. They have gained the skill to respect others' views and ideas. We started the work with a group of people and started the concept of teamwork to create and complete a single project. I was impressed by the concept of this work because it started with each person completing the work required for the same project and started the group by putting ideas and ideas to accomplish this project. The main principle is to understand others' minds and ideas. There are no differences and differences of opinion. I gained the skill to work with one team and respect the opinions of others and how to solve problems and put ideas and solutions in a manner that suits everyone.

I have many strength skills but this does not mean that there are weaknesses I have the following strengths I have control over a full team in the presence of a teamwork process I have the skill to deal with all age groups whether inside or outside the workplace regardless of the level The skills of using some of the modern programs. These are also weak points and should be improved. It is best to learn about all the programs that support my work. Also, I can improve the strengths by maintaining their level and not reducing and taking many from group workshops to develop these Skills. The vulnerability can be improved by learning and taking several preparatory courses for modern programs to learn about the start-up of each program. I want to learn new skills such as free drawing, communication skills with other cultures, learning other languages and learning how to produce and film.

One of the skills I am trying to achieve in full is the skill of learning on modern programs, especially in all Adobe programs, and because my professional ambition depends on these programs

because I seek the agent of this company in one country and also the director of media and design for a specialized company in the media and design.

I talk about my passion for life, but before I talk about it, we get to know the concept of passion in life in general

Passion: How can you live a life filled with passion and ambition?

Passion A feeling that makes human life meaningful, and enables him to perform many tasks without feeling bored, give you a picture of how to live a life full of passion. Passion is the strong feeling that makes the person in most cases shine and always drive him to adventure and gives him the joy of life, and gives the passion of the human magic of his own makes it radiate activity and joy, and in order to enter into this humanitarian situation is very deep must have an inner desire to bring about It means that you have the strength and the courage to overcome your fear and go through a different life in which you are prepared to do everything you can to achieve it and in return are willing to accept all the consequences and unexpected results with a deep conviction that you will succeed in the end no matter how long, To live a life filled with passion you must do the following:

How to Live Life with Passion?

Passion is always associated with goals: Passion basically means to offer actions and actions that make us happier and be willing to make every effort to do so.

adventure love: Adventure is the hallmark of life and its spirit. It makes you take risks and take a different path Do not know exactly how you will end like leaving your job that you do not like doing and starting your own business or making the decision to travel to an unknown country around the world.

Leave the comfort zone fatal: Doing the same things over and over again routinely makes you get used to those actions and feel comfortable doing the same thing every day.

Self-confidence: Self-confidence is the feeling that makes you in a state of psychological satisfaction and the belief that we are on the right track and that the difficulties we may face are just challenges we must overcome.

Playing sports: Exercise leads to adrenaline in the body, which necessarily leads to an increase that drives the enthusiasm towards life and gives a great sense of strength and overcome the boredom and develop a sense of happiness.

Develop the artistic aspect of your character: Each of us has a technical aspect to his character. This artistic aspect is what earns the life of its brilliance and makes it look more beautiful. The technical aspect is closely related to the spiritual aspect of our characters and helps the human to overcome the psychological problems that may occur in the future.

Now I am talking about my passion for the next life as I mentioned previously that I am interested in the field that concerns me. I want to work on developing myself in this field and so I became one of the businessmen in the field of media.
