#### Item(s):

##### **Class 03 No. D2046**

Built in Doncaster in 1958- moved and converted to industrial use in Milford Haven in the 1970s and is being sold in as seen condition by the Plym Valley Railway Co. Ltd.

D2046 has started and moved under its own power at the PVR but because of a lack of time and resources it's restoration stalled and as a result is being offered for sale.

Any parts that have been removed from the engine are included in the sale. There are some other parts including spares exhausters that can be discussed.

The locomotive can be made available for cold inspection by appointment. The locomotive can't be started at this time unfortunately because of the lack of a suitable compressor for the air start.

This engine will need an extensive restoration and an inspection of the engine is recommended as it will be sold as seen.
