

the red blotter. The first letter I ever
wrote you I think was written by a
very little girl but from this same
desk. Since then I guess I changed and
gotten a little older but I still love
to write to you as much as ever and
just plain love you fifty times more.

I must close now darling & go help
with the dinner. I don't know
something about cooking sometime and there's
no time like the present. Please be careful
Tommy and don't be too impatient to get
out. All my love forever and ever
Jean
