Cybersecurity & Critical Infrastructure Solutions

National CTI & CI Platform Development

Design, development and delivery of Cyber Threat Intelligence (CTI) and Critical Infrastructure (CI) protection platforms for government and defence clients — combining vulnerability correlation, behavioural anomaly detection and regulator-ready reporting within a sovereign, in-country deployment model.

12,500+ Vulnerability Signatures Tracked

SAP Cybersecurity Assessment & Audit

Evidence-based, agentless assessment and audit of business-critical SAP landscapes, benchmarked against national cybersecurity controls, ISO/IEC 27001 and NIST SP 800-53. Covers vulnerability correlation, configuration drift and behavioural anomaly detection across ERP, database, cloud and integration layers.

34 Assessment Domains Covered

Sovereign Cyber Advisory & Delivery

Strategic cybersecurity advisory for state and defence entities — including SOC architecture and augmentation, regulatory compliance mapping, detection engineering and capability handover, so a single engagement matures into a durable, nationally-owned security posture.

8 Regulatory Frameworks Mapped

Specialised Security Solutions

Physical Security

Delivering static armed and non-armed security solutions tailored to the operational and risk profile of each client with integrated Command Centre & Cybersecurity. MMC ensures compliance with local regulations and integrates professionalism, discipline, and situational awareness across all deployments.

HUMINT

Gathering intelligence through human sources. Our experienced operatives provide critical intelligence that cannot be obtained through technical means, supporting strategic decision-making and operational planning.

Physical Security Testing

Testing service for physical security systems, securing people and assets. We conduct comprehensive assessments to identify vulnerabilities and recommend improvements to protect critical infrastructure and personnel.

EOD

Support of small and medium Foreign Defence Contractors with their Offset Obligations.

❖ Problem

Small and Medium Foreign Defence contractors face difficulties in complying with the Tawazun Offset Program

❖ Action Taken

- ❑ Negotiate with the Offsetter the technology he is willing to develop locally or the amount he is willing to pay (CPP) to exit the Offset Program.
- ❑ Workshop with Tawazun Offset Department on the main Defence sector to focus on.
- ❑ Confirm the interest in our Concept Paper before sending it officially.
- ❑ Modify and update the concept paper with Tawazun inputs to receive a faster approval

❖ Solutions

- ✓ Build Offset Idea Validation Process
- ✓ Create Offset Ideas & Offset Concept Paper
- ✓ Lead Capture of Local Partner Process
- ✓ Create Offset Business Plan
- ✓ Support Offset Project Execution & Defence Contractors' Performance
- ✓ Work with Legal Team to Support Offset Term Sheet
- ✓ Lead Offset Project Approval &/or Rejection Timeline
- ✓ Report Using the Approved Offset Project Templates and Letters
- ✓ Make Offset Recommendations

Proven Track Record

Successful & Sustainable Projects

Security services

Deliver security services for critical infrastructure including static guards, CCTG monitoring and cybersecurity all linked to a centralised command center

Defense Industrial Park

Successfully developed and implemented defense industrial park projects that enhanced local manufacturing capabilities and technology transfer.

Military Trading Equipment

Managed complex defense trade programs ensuring compliance and maximizing economic benefits for all stakeholders involved.

Military Training

Designed and delivered specialized military training programs that enhanced operational capabilities and readiness for defense forces.

Contact Us
