

1.

Combine like terms: $x^2 + 9x + 7x + 63$.

2.

Factor $5n^2 + 40n + 80$.

3.

Factor $y^2 - 18y + 81$.

4.

Complete the square to make a perfect square trinomial. Write the result as a binomial square.

$$b^2 - 4b$$
