Technology at work for you

PROVIDING YOUR BUSINESS AND PROJECT WITH THE QUALITY PRODUCTS AND SERVICES YOU EXPECT.

Call Alistair Owens - Managing Director, to discuss your requirements

OUR PRODUCT SELECTION

- ❖ **Raychem**, liquid leak detection, hot water temperature, grease flow maintenance products and floor heating products.
- ❖ **Picobox**, facility management monitoring systems, spot sensors, temperature and humidity sensors.

WHAT WE DO

LIQUID LEAK DETECTION

- ❖ MONITOR
- ❖ DETECT
- ❖ LOCATE
- ❖ REPORT

PIPE HEATING

- ❖ HOT WATER
- ❖ TRADE WASTE
- ❖ FROST PROTECTION
- ❖ FLOOR HEATING
- ❖ UNDER TILE HEAT MATS

SYSTEMS MONITORING

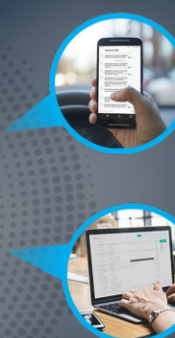

- ❖ WATER LEAKS
- ❖ FUEL LEAKS
- ❖ TEMPERATURE & HUMIDITY
- ❖ GAS
- ❖ AIR CON

Liqualogic Australia is a specialist company providing innovative technical solutions for the commercial and industrial markets. We are authorised distributors in Australia for: **nVent Raychem** global leaders in liquid leak detection, hot water temperature maintenance, electric floor heating and flow maintenance products.

Exclusive Australian distributor for **Picobox** facility management alarm monitoring systems and sensor products

We offer expertise in all areas of:

- ❖ Commercial and Industrial liquid Leak Detection
- ❖ Hot water Temperature Maintenance
- ❖ Grease Waste flow maintenance
- ❖ Floor Heating
- ❖ Under tile Floor Heating
- ❖ Temperature and humidity sensing
- ❖ Wireless monitoring solutions
- ❖ Systems monitoring products

flexible solutions for your project needs

INSTALLATION

With a skilled team of certified installers at call we can offer full installation of the product range we provide. With a background in many large-scale projects both industrial and commercial in the Asia Pacific region and take pride in the services offered.

From a simple system to a large-scale project Liqualogic are there to assist.

COMMISSIONING AND SITE SERVICES

Liqualogic offer site supervision and commissioning services to our customers. We can offer simple overseeing of an installation, followed by the final sign off to enable full manufacturers warranties. As our manufacturers offer long warranties with strict guidelines, it is essential a project installation is carried out as per specification.

Working directly with our manufacturer's day to day, you can have peace of mind in our support.

LIQUALOGIC PROVIDES A TOTAL END TO END SOLUTION

PRODUCT SALES

Competitive pricing along with quick delivery of all our product ranges. Project timeline and specifications are always considered and adhered too. As we represent some of the best products in the market, they all come with full manufacturers warranties in place.

**Call us for a discussion on how we can assist you with your next project.*

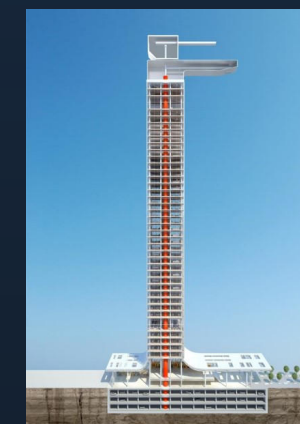

HEAT TRACING SOLUTIONS

In 1970 **Raychem** first developed and launched self-regulating electric heating cables.

The cable delivers the right amount of heat exactly when and where it is needed. As the temperature drops, more heat is produced. Conversely, as the temperature rises, less heat is produced.

Also used for water temperature maintenance as well as greasy waste flow control for optimum performance.

Liqualogic are experts in design and supply of the perfect solution for the project scope.

LEAK DETECTION

Huge damage and loss occur most frequently when leaks are undetected over extended periods. Moreover, the presence of a leak can be difficult to find. This puts risks to the equipment and assets and can cause tremendous damage once left unnoticed.

A high-quality Leak Detection System is an essential component of risk management as it can detect leaks quickly, locate it accurately, issue false alarms, and work effectively under all operating conditions. A leak detection system which provides high accuracy readings once a leak has been detected and immediately alert you to prevent a bigger situation.

Liqualogic can provide a reliable system with proven track records in the application in offices, hotels, museums, computer rooms, data centres or other commercial building applications.

"Ask us about our new 'plug & play'"

Fuel leak detection systems

All pre-wired for easy installation

WATER LEAK DETECTION SYSTEM

Protecting Your Valuable Assets

- ✓ Data Centres
- ✓ IT Facilities / Communications
- ✓ Storage/ Archive Areas
- ✓ Plant & Services Rooms
- ✓ Offices

FUEL LEAK DETECTION SYSTEM

Applications:

- ✓ Refineries
- ✓ High consequence areas
- ✓ Batch and transfer lines
- ✓ Airport hydrant systems
- ✓ Tank Farms
- ✓ Above grounding piping

OUR PARTNERS

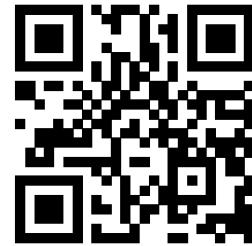

We are authorised distributors in Australia for:

- ❖ **Raychem**, the global leaders in liquid leak detection, heat tracing and floor heating products.
- ❖ We are the exclusive distributors for **Picobox** facility management alarm monitoring systems.

Make Liqualogic Australia your one stop company for:

- ❖ Water and grease pipe heating products
- ❖ Liquid leak detection products and accessories
- ❖ Under tile floor heating
- ❖ Commercial, residential and industrial projects
- ❖ Installation and commissioning services
- ❖ Systems monitoring solutions
- ❖ Design and engineering
- ❖ Maintenance contracts
