

EgyptScape®

Landscape contracting,
Ornamental plants and seeds production

ABOUT US

Egyptscape was established in 2012 with its founders aiming to be one of the market leaders in the landscape contracting industry.

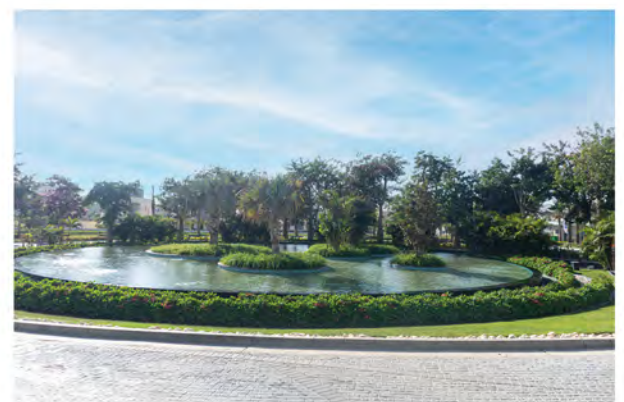

Among the past ten years, we accomplished our client's satisfaction by providing high end products in softscape, hardscape, automated irrigation system, landscape lighting and water features contracting for both residential and commercial projects.

And by 2015 we expanded our services to produce ornamental plants and seeds serving the local market and looking forward to export our production worldwide.

We also provide full engineering solution for landscape works
(Shopdrawing - hydraulic calculations - voltage drop calculations - Lux calculation)
