

Park & Recreation, May 23, 2022

The committee met at the pool and looked over the many “jobs” that have been completed. We discussed the workday on May 28th and wrote down what needs to be done on that day. A long-term goal list has been started, and we are hoping to accomplish some of those goals in the fall.

We are looking at picnic tables from Home Depot and hoping to get those ordered this week. The pool is filling with water, and the shower rooms have been power washed. All chairs are out on the deck and will be arranged on workday. The manager’s room is set up and ready to go. The partition that divided the concession stand has been removed, which allows more room for the workers to do their job.

Amplex is coming on May 26th and the Health Inspection is June 1st and the new refrigerator will be delivered on June 2.

The next meeting is June 27th at 5:00.
