This chart is for illustrative purposes only; it does not constitute investment advice and must not be relied on as such. The value of investments and the income from them can go down as well as up so you may get back less than you invest. Past performance is not a guide to what might happen in the future. Transaction costs, taxes and inflation reduce investment returns. This chart shows the inferred growth of money invested on January 1st, 1926. The Return of each asset class is the average of calendar returns and the volatility of each asset class is the standard deviation of the calendar returns. Major political and financial events are indicated by • and . The portfolios are hypothetical and are rebalanced annually on the 1st of January. All investment income is assumed to be reinvested, unless otherwise stated. No transaction costs or taxes are included.
