C.R.I.S.T.A.L. Audiophile Sound Experience at Singapore River Safari

Singapore River Safari is Asia's first and only river-themed wildlife park and is home to 400 plant species and over 8,700 aquatic and terrestrial animals representing close to 260 species, including one of the world's largest collections of freshwater animals.

During their recent selection process for an audio solution for their Boat Plaza, GECKO® C.R.I.S.T.A.L.® Audiophile sound systems were adopted. This project is a collaboration between United Records and GECKO® Singapore.

"When Singapore River Safari invited us on board to propose a solution for their Boat Plaza, we were glad to present to them the extremely reliable GECKO® C.R.I.S.T.A.L.® Audiophile equipment for their consideration, of which they tested and accepted. We installed REVELATION SR 612RF 12" speakers and wired them together with our compact format EXODUS ATOM MXR 1208A active mixing consoles using TRUTH series cables, the venue is now ready for C.R.I.S.T.A.L.® Clear sound that everyone can enjoy!," said Eric Wong,

Founder and Chief Sound Engineer of United Records. "For the hosts, we custom-designed-and-built our latest (world's first) hybrid PASSION wireless microphone system that fuses the best of both analogue and digital technologies to deliver the best natural tone of their voices wirelessly in this modern digital era that is filled with digital interferences," concluded Eric.
