

The Centre for Customs and Excise Studies presents

SUSTAINABILITY IN CUSTOMS OPERATIONS

Rethinking Customs Operations for a Sustainable Future

This foundational short course equips customs professionals with the frameworks, strategies, and insights needed to understand the environmental impact of customs operations and drive positive change in their administration.

Participants will explore practical approaches to assess environmental impact, identify improvement opportunities, and embed sustainability thinking into day-to-day operations.

Delivery mode

- This online program consists of 2 x 3-hour sessions delivered across two weeks.
- The program is designed to be delivered to teams or leadership groups.
