2026 FLIGHT COLLECTION DETAILS

We will be collecting and dropping off course participants from **Toulouse and Bergerac**.

For the arrival flights, please note the following:

- We will make ONE collection only to each airport to accommodate all flight times - this will therefore be mid-late afternoon on the day of arrival. The absolute latest flight arrival time that we can accommodate is 6pm.
- The exact collection time will depend upon the flights chosen by all course participants and will be communicated to you in advance of your course.
- Those who are arriving outside of these times or at alternative airports will need to make their own way to Studio Préniaç at their own cost. Please contact us to discuss.

For the departure flights, please note the following:

- We will make only ONE journey to each airport to accommodate all return flight times.
- The earliest flight time we can accommodate is 11am but mid-afternoon return flights are the preferred option.
- We will leave Studio Préniaç in the morning at an appropriate time to accommodate all return flight times for the participants on that course / from that airport.
- Those who are leaving outside of these times or at alternative airports will need to make their own way to the airport at their own cost. Please contact us to discuss.

FOR THOSE ARRIVING FROM THE UK

We have provided an overview of the **direct** inbound flights between the UK and France that we will collect from. Note that the flight times vary by course so please scroll through the following pages to find the details for the course you are booked on. Please note that these flights are correct as of 10/1/26 and we will update as necessary should the flight details change.

There are also many options to Toulouse from other UK airports with one stop (for example, via Amsterdam, Brussels etc.).

FOR THOSE COMING FROM OTHER COUNTRIES

Please use the below as a reference guide to help you to book appropriate flight times.

As always, let us know with any questions.

Best wishes

Nicki & Chris
