O LIGHT

USER MANUAL

Note: The max output can change due to remaining battery level and flashlight temperature. When the battery level is at the P5 level or above and the temperature of the flashlight head is below the threshold value set at 80 °C, output level L8 (25,000 lumens) will be the max output. When the battery level is under level P5, or when the temperature is above the threshold value, L5 will then be the max output instead of L8. When the temperature rises above 105 °C, the max output level will be L4. See the table below for details: (0 means applicable, X means not applicable)

BATTERY LEVEL	TEMPERATURE	L8	L7	L6	L5	L4	L3	L2	L1
P5-P8	<= 80 °C	0	0	0	0	0	0	0	0
P5-P8	>80 °C	X	X	0	0	0	0	0	0
P1-P4	< =105 °C	X	X	0	0	0	0	0	0
P1-P8	>105 °C	X	X	X	X	0	0	0	0

X9R CASE

When air pressure inside and outside the X9R case is changed due to extreme temperature or altitude changes, this could potentially cause the case lid to not open or collapse. To counteract this effect, Turn the counterbalance valve on the front of the case counter-clockwise to balance the pressure.

- While charging, the LED indicator on the top blinks once per second.
- While the battery is 10% or lower, the lowest LED indicator (P1) blinks.
- Max time to reach a full charge: 4 hours (DC Adapter), 7 hours (Car Charger).

ANTI-ROLL RING INSTALL

Place the anti-roll ring from the packaging and slip it into the light starting from the tail cap. Press it into the designated area located on the flashlight head.

DANGER

- DO NOT throw the light directly into human eyes. This may cause temporary blindness, or permanent damage to the eyes.
- DO NOT cover the light head when the flashlight is on, or place the flashlight head on the ground. The radiation energy of the flashlight may cause damage to the flashlight itself, or even result in burning to other materials.
- Please DO NOT cover a flashlight that is on. The generated heat can cause burning or even unpredictable disasters.

Dongguan Olight E-Commerce Technology Co., Ltd

4th Floor, Building 4, Keyu Industrial Park, No. 6 Zhongpan Road, Changan Town, Dongguan City, Guangdong, China
Made in China

E 06, 10, 2021

3 060, 010, 9996

IN THE BOX

X9R Marauder, DC 16.8V/2A Adapter, Strap, Plug, DC 16.8V/1.5A Car Charger, Anti-Roll Ring

FEATURES

- Highest brightness level ever produced by Olight reaching a max output of 25,000 lumens.
- Smart output control to prevent overheating - Proximity sensors that drop the output automatically when the flashlight head approaches a nearby object. Active thermal management system that reduces the output when the temperature gets too hot to prevent any damage or overheating.
- Real time battery level display while indicating an 8-level output selection.
- Improved built-in heat dissipation system design for more effective cooling of the flashlight body.
- Ergonomic design - Milled finger grooves, shoulder strap and concealable strap hole for convenient and comfortable use.

WARRANTY
Within 30 days of purchase: Contact the original seller for repair or replacement.
Within 10 years of purchase: Contact Olight for repair or replacement.

Battery Warranty: Olight offers a one year warranty for all rechargeable batteries.

This warranty does not cover normal wear and tear, modifications, misuse, disintegrations, negligence, accidents, improper handling, or repair by anyone other than an Authorized retailer or Olight itself.

NOTE:
1. Before your first use, remove the protective film on the lens. Unscrew the tailcap and take out the battery pack.
2. Remove the insulating film from the battery pack.

EU-Declaration of Conformity can be found here: <https://oightworld.com/ce-declaration>

06

NOTE

- There may be pressurized air in the charging port which can cause a popping sound when opened due to air exiting the port.
- When air pressure inside and outside the X9R case is changed due to extreme temperature or altitude changes, this could potentially cause the case lid to not open or collapse. To counteract this effect, Turn the counterbalance valve on the front of the case counter-clockwise to balance the pressure.
- Real time battery level display while indicating an 8-level output selection.
- Improved built-in heat dissipation system design for more effective cooling of the flashlight body.
- Ergonomic design - Milled finger grooves, shoulder strap and concealable strap hole for convenient and comfortable use.

EXCLUSION CLAUSE

Olight is not liable for damages or injuries sustained resulting from the usage of the product inconsistent with the warnings in the manual, including but not limited to using the product inconsistent with the recommended lockout mode.

06

3. Screw the tailcap back on tightly after you insert the battery pack.

CHARGING

For optimal user experience, completely charge the battery before your first use. Due to IATA regulations, we are not able to ship the flashlight with a full charge. Remove the power adapter from the packaging, open the charging port on the flashlight next to the switch, and connect the adapter to the charging port while connecting the other end to a wall socket. When your X9R starts charging, the LED battery indicators will display the remaining power level while the next level shows a blinking indicator. When the blinking stops and all levels are illuminated, the flashlight is fully charged. Remove the adapter from the charging port and replace the port cover making sure it has a tight seal. The same directions apply to the car charger.

NOTE:

- While charging, the LED indicator on the top blinks once per second.
- While the battery is 10% or lower, the lowest LED indicator (P1) blinks.
- Max time to reach a full charge: 4 hours (DC Adapter), 7 hours (Car Charger).
