

INSTALLATION & MAINTENANCE INSTRUCTION ECOTEAK DECKING & TABLE TOPS

Installation :

- Install the deck in the same way you do with a real teak deck, see teak deck instructions.
- When the deck is in place you might want to renew the surface look around joined pieces etc. Use an 80 grit sand paper. By hand, brush / sand lengthwise a couple of times.
- A composite decking is brittle so you might need to be several people to handle bigger pieces.

Maintenance :

- Wash the deck or the table tops with a teak shampoo or mild soap when needed.
- After a couple of years you can renew the surface by brushing / sanding a couple of strokes lengthwise to make it look like new.
