Maple

Esche
Ash

Walnuss hell
Light walnut

Nussbaum
Nut tree

One surface is not like another

The surface design of a partition wall is at least as important as its functionality when it comes to creating the perfect solution for integrated room scenarios. Because a harmonious overall picture only results from the interplay of all variables. The complete subordination of the surface design to the colour concept is only one conceivable variant. The partition wall can just as easily become the determining element of the colour design, and here, too, there are no limits to the imagination.
