

## Stairnosings and Trim Maintenance

- To ensure the stairnosings keep their appearance, they should be cleaned weekly, more frequently in areas of heavy traffic.
- Build-up of dirt and grease can prove hazardous.
- Inserts should be cleaned with a mild detergent diluted with water on a slightly damp cloth.
- Leave for a few minutes to break up soilage, then wipe off with a clean damp cloth.
- Allow to dry before use to avoid any slip hazards.
- Aluminium can be lightly brushed with steel wool.
- Polishes will reduce anti-slip properties and solvent cleaners are not suitable.
- Strong detergents must not be used on stairnosings inserts as this may cause fading of the insert colour.
- DO NOT use steam cleaners or power washers.
