

Falcon and OGS in strategic tie-up

Through the tie-up Falcon will bring into the region, niche expertise and capability of subsurface engineering, production facilities management and turnkey drilling

Khawaja ... increasing footprint

BAHRAIN-based Falcon Petroleum Consultants and UAE-based OGS FZE (Oil & Gas Services) have entered into a global partnership, combining Falcon's sought-after advisory with world-class expertise of OGS in subsurface engineering, production facilities management and turnkey drilling.

Going strong after 14 successful years, Falcon is the only Bahraini company providing various aspects of upstream petroleum consulting with 35-plus clients in 16 countries in the Mideast/Asia, Europe and North America. Now establishing exclusive partnership with OGS in Bahrain, Kuwait, Saudi Arabia, Qatar, UAE, Oman, Yemen and Pakistan, makes Falcon proud to be able to bring into the region, niche expertise and capability of subsurface engineering, production facilities management and turnkey drilling.

OGS has wealth of subsurface engineering experience in more than 60 oil and gas fields around the globe, particularly in Central Asia, Russia, Africa, Europe and North America. In addition to subsurface engineering, OGS has expertise and experience in production facilities management as well as star performance in turnkey drilling.

Falcon is strategically located in the Kingdom of Bahrain since 2005 catering to global energy companies with primary focus on the upstream petroleum industry of the Middle East. The company's mission is to function as a catalyst for accelerating the growth of clients facing ever-greater oil and gas challenges. Falcon is backed by a vast network of experienced petroleum engineers, operational experts, global manufacturers of upstream petroleum equipment and material, as well as financial advisors.

Omur Ozavci - CEO, OGS FZE says: "Partnership of these two professional companies OGS FZE and Falcon Petroleum enables inter-discipline synergies in petroleum advisory as well as engineering services, a unique blend we offer for success of our clients in oil and gas industry."

Saud Khawaja, managing director, Falcon Petroleum Consultants, says: "We are very pleased with this strategic partnership with OGS, a world renowned oil and gas engineering company, which will increase our combined footprint in more than 30 countries, enabling us better serve our clients around the globe."

Falcon-OGS is a solutions provider and in addition to petroleum advisory, also offers full suite of oil and gas engineering services with in-house expertise of highly experienced geologists, geophysicists, petrophysicists, reservoir engineers, petroleum engineers, drilling engineers, workover engineers, surface facili-

ties engineers, HSE specialists and economists armed with associated software and backed by Falcon-OGS local management to support the respective disciplines for its valued clients.

Bolt it right first time, every time with Hi-Force Hydraulic Bolt Tensioners!

Hi-Force, the UK's leading manufacturer and supplier of hydraulic tools, offers several bolt tensioner options designed for tightening and loosening applications in numerous industries.

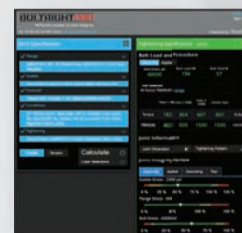

The range includes spring return, topside and sub-sea bolt tensioners with capacities up to 2,649 Nm, suitable for standard size bolts up to 4" (M100) and operating at maximum working pressure of 1500 bar. Custom designed options can be manufactured to meet specific and unique customer requirements.
