RAY-BAN TITANIUM

ULTRA-LIGHT • HIGHLY RESISTANT • HYPOALLERGENIC

COMFORT IN MORE THAN JUST DESIGN

Ray-Ban spent the last decade studying and testing the application of Titanium, assuring a safe material is a major part of their comfort. Titanium frames are hypoallergenic, nickel-free and corrosion-resistant, making them ideal for sea-hardened sailors and sensitive skinned accountants alike. So your face and frames will never be surprised with a bad reaction.

KEEP ON KEEPING THEM ON

Ray-Ban Titanium is designed strong but kept light so you can leave them on as long as you like. Along with their clean, minimalist design, Titanium frames are most importantly crafted for long comfort. So you can put them on and soon after forget that you ever did.

THE LIGHTER SIDE OF STRENGTH

Using Titanium makes the frames stronger while keeping them lighter. In fact, they're 50% lighter than metal or steel frames. They are also just as strong as they are light, designed for long durability to withstand years of opening, closing and unsuspected dropping and squashing. Both when used in its pure state or combined with β titanium, their strong materials, high mechanic resistance and superior elasticity equip them to survive it all.

TECH

CARBON FIBRE COLLECTION

RAY-BAN TECH CARBON FIBRE COLLECTION

ENDLESS INNOVATION

More than seventy years after introducing the first pair of Anti-Glare sunglasses to the world's top pilots, Ray-Ban introduces the Ray-Ban Tech product line of sunglasses and frames. Designed with progressive materials and techniques, the models featured under the Tech name reflect Ray-Ban's celebrated history of leading with inventive style and technology. To lead off the Tech Collection, Ray-Ban introduces the Carbon Fibre Line and the new CL • Carbon Lite product, tech's flagship frames and the most advanced Ray-Ban glasses to date.

LIGHTER AND STRONGER

Carbon Fibre reinforced plastic resin sheets are featured in Ray-Ban's Carbon Fibre wrap temples. They consist of 7 different layers of carbon fibres mixed with resin. The sheet is then water-cut to form the shape of our slimmest wrap temples. The resulting frames are light, strong, flexible and highly resistant. The glasses are further enhanced by Monoblock hinges, which include no welding in the front frame for added strength.

All sun lenses withstand the Drop Ball test, in which a 5/8 inch steel ball is dropped onto the lens from a height of 50 inches. From the frames to the lenses, the Carbon Fibre's can hold up to all the drops, squashes and wear you'll put them through.

THE STYLES AND LENSES

The Ray-Ban collection comes in a number of different colours and styles, providing a range of fashion as deep as their functions: seven sunglasses with countless combinations of different temples, colour of temples and lenses along with the carbon fibre black original and aluminium grey styles. The lenses are featured in two different versions, polarized and non-polarized, and available in three different colors – green, brown and mirror grey. Non-polarized versions are available, in plastic and crystal, equipped with Ray-Ban's legendary G-15®, B-15® and mirror lenses. And from now on, Ray-Ban Tech is available also as Frames Collection with 4 different styles and various combinations.

WHAT IS CARBON FIBRE

Carbon Fibre is one of the most advanced performance materials available, made up of extremely thin fibres to give it an incredible strength to weight ratio. Several thousand carbon fibres are twisted together to form a yarn, which may be used alone or combined with plastic resin and molded to form composite materials. Once applied in the most technologically advanced fields, nowadays thanks to a high commitment to innovation and advanced technology Ray-Ban has succeeded in applying this new advanced material to offer a brand new range of sunglasses and frames that pave the way for further innovation.

COMPREHENSIVE COMFORT

The Carbon Fibre's end-pieces are rubber-injected, along with an embossed Ray-Ban logo on the inside, providing comfort and a strong grip. The bridge is easily flexed and adjusted so they can comfortably fit on faces of all shapes.

CLEARER SIGHT WITH SUN LENSES

The Carbon Fibre product features the most advanced lens technology with unrivaled vision and complete protection. All of course available in two different versions of lenses. P³ PLUS and P³ lenses featured in crystal and plastic respectively, provide a long list of benefits by improving your vision and protecting your eyes. Let colours pop and objects crisp with high colour definition and enhancement. Get more world and less glare with polarized lenses covered in an anti-reflective coating. And while your eyes are 100% protected against all damaging UV rays, the lenses are protected from drops with the Hydro-oleophobic coating.

Ray-Ban
LightRay

ABSOLUTE INNOVATION: THE MOST LIGHTWEIGHT RAY-BAN FRAME EVER MANUFACTURED.

Ray-Ban presents Light Ray Optical, a new line of completely innovative prescription glasses.

Ultra-thin and flexible, with only 1.7 g in weight these glasses are the lightest ever manufactured.

The minimalism and slick elegance of the lines highlight the exclusive technical features, extreme care for details, and perfect wearability. Light Ray Optical, Ray-Ban's high-tech prescription glasses designed for the comfort, exclusivity and style of its customers, are available in 3 models.

THE MATERIAL

The new Light Ray Optical glasses are made of a special high-quality, high-performance titanium alloy.

FEATURES:

- ultra-light, ultra-flexible
- nickel-free and hypoallergenic
- corrosion resistant
- good memory abilities
- durable

No screws and no welding. 1,7 gr

Patented joint hinge with special devices for smooth movement, designed exclusively for these glasses.

The screwless, wear-proof hinges undergo 5000 cycle resistance tests.

The nose bridge consists of a single piece with integrated pins and hinges.

The new Pin lens mounting system allows the mounting of lenses of any thickness.

Perfect stability and wearability thanks to the use of 3D technologies to design and realize thicknesses.
