

### **Main Pond habitat management: Shelter Belts (above) 25-26 September 2023**

The second phase of the Bluespaces project. Works were undertaken by Haywood Contracting to:

- create inlets & outlets with shallow scrapes, shelter coves & protruding banks
- create a more varied pond edge, including planting of rushes, to offer more habitat and protection for wildlife

**The shelter belts today**

### **Habitat re-wilding Main Pond Island January 2026**

Re-wilding work was carried out by Wild Intrigue using the Beaver coppicing technique. The aim was to create a more natural habitat, making the site more attractive for nesting Swans and Waterfowl. Mallard, Gadwall, Coot and Moorhen all bred on the Main Pond in 2026
