

# **The Hypocritical obsession to Being “Right” in a Parasitic Narcissistic Entitled Society**

*by Pedro Lima*

A parasitic, entitled, narcissistic society is consumed by curated, prideful ignorance. It is argumentative, judgmental, and self-righteous, clinging to petty envy, jealousy, bitterness, and victimhood as identity.

It must be right because someone else must be wrong.

To sustain this delusion, it indoctrinates fear, lack, unworthiness, obedience, compliance, complacency, and subservience. These are not accidents; they are curated frameworks, tools used to justify control, curated false hierarchies, and illegitimate authority while disguising self-serving, parasitic, exploitative, speculative, and binding agendas behind ideologies, dogmas, order, safety, justice, security and moral deceptive performances.

Power becomes a performative curated hierarchical hollow costume.  
Status becomes an illusion.  
Authority becomes a theater of vanity and deception.

In this dysfunctional, delusional system, people are rewarded for being “right,” follow the maze of bureaucratic laws, rules, not for being truthful, authentic, or having integrity.

Gossip and slander replaces self-reflection.  
Blame replaces accountability.  
Gaslighting replaces dialogue.  
Compliance replaces integrity.

Anyone who refuses to join the cultural club of hypocrisy, anyone who does not submit to the curated moral identities and roles that dictate who is “good” and who is “bad,” who is “right” and who is “wrong” is targeted, persecuted, diminished, and attacked.

Not because they are wrong but because they expose the lie when standing in authenticity, not compromising their inner peace, inner authority for anyone or any system.

A societal framework system addicted to righteousness cannot tolerate sovereignty, authenticity, integrity, and truth.

A society that feeds on judgment cannot survive raw authentic sovereign truth, and a hierarchy built on fear collapses the moment someone refuses to participate in its societal dysfunctional parasitic obsessive delusion.
