

# **Beyond Money - Remembering the True Currency of Sovereignty**

**by Pedro Lima**

Money functions as the currency of power and status within a hollow, surface-level, narcissistic society; a collective dependent on people and systems of control, validation. It operates through a centralized, corrupt economic structure in which a few at the top of a Ponzi-like hierarchy accumulate, hoard, and bask in greedy, parasitic self-serving dynamics, while the many are bound, exploited, and subjugated.

Within this parasitic hollow system, the few are the hollow architects, designing the rules that dictate how the collective may earn a living, enforcing supervision, surveillance, coercion and control to justify the ongoing extraction of the life force of the many through labor.

The collective is conditioned to accept domination and enslavement by hollow, insecure, pride-driven, and spiritually impoverished individuals, along with the bureaucratic frameworks they engineer.

These systems mislead people into believing their worth and energy are defined by a job title, a nationality, or the approval of perceived “leaders” and “authorities,” upheld by a maze of laws, norms, and rules that suppress individual free will, and labeling it as order, security, safety, progress, normalizing enforcement, coercion, conflict, punishment, and curated narratives that shapes the perception of the many, with the many consenting, agreeing, cooperating and collaborating with the very same people and systems that exploit, dominate and diminish their inner authority.

Money holds value only as long as the many agree to participate in this parasitic, distorted, and dysfunctional societal parasitic entanglement.

When sovereign souls remember who they truly are, perception shifts. The illusion begins to collapse. For the most valuable currency has never been money, it is accountability for one’s own sovereign, authentic, sacred energy.
