## **WHY I CARRY AND SUGGEST NATURES SUNSHINE PRODUCTS IN MY PRACTICE**

I have personally been using Natures Sunshine products for over 24 years now and have experienced optimum health with undeniable results.

### **QUALITY**

Having owned a herbal store, I know firsthand that having quality products is so very important. Customers are trusting you with their health decisions and are looking for results to recover from their health elements and concerns. NS has been around for 50 years and is the first herbal company to encapsulate herbs. They have \$10 million of equipment to validate the raw material coming in for its medicinal benefits, and make sure there are no pesticides and herbicides in the herbal products their consumers are ingesting!

### **DID YOU KNOW THAT THERE ARE CERTAIN PARTS OF AN HERB THAT HAVE THE MEDICINAL BENEFIT?**

Yes it's true! In some herbs the medicinal benefit is in the root, some of the stem, while others it's in the flower. Note: 90% of nutritional companies do not take this into consideration when manufacturing a supplement. You, the consumer, have no idea if the herbal supplement you are taking has everything you're expecting.
