Regulan® GreenTurf

The toughest and most durable grass pigment

Restoration of
the natural
green colour
of the lawn

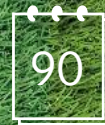

Regulan® GreenTurf – General Aspects

- ❑ It restores the natural green colour of the lawn both during dormancy in winter and during the rest of the year, in areas damaged by pathogens, water stress etc.
- ❑ It can also be applied with sand, giving the mixture that characteristic natural green.
- ❑ Once used, the visual effect is immediate. This pigment is suitable for all types of lawn, from football fields to golf courses, gardens, racing circuits, etc.
- ❑ Regulan® GreenTurf has been used in the Olympic Games since its 1988 edition in Seoul, in the NFL (Super Bowl) finals since 1990, in the Soccer World Cups, as well as in various editions of the Ryder Cup, among other high level sports events

Achieve your desired colour

The dosage is flexible depending on the green you want.

Keeps the green colour for more than **90** days

Regulan® GreenTurf is Safe

- ❑ Regulan® GreenTurf does not contain hazardous chemicals harmful to the grass.
- ❑ Does not cause any kind of problem in light absorption or lawn development
- ❑ Once dry, the colour is not transferred to the skin or clothing.
