

Press Release: June 2024

J&S Franklin Limited / Defencell are pleased to announce receipt of award of contract from National Emergency Management Agency (Australia) for our Defencell Products for use in Flood Management.

This award follows the excellent response to the Floods experienced in New South Wales in 2023 and the deployment of the Defencell Products to protect Communities, Infrastructure and Vulnerable areas after widespread and persistent flooding in the NSW Murray-Darling basin.

Defencell was purchased by the State Emergency (SA SES) purchased DefenCell due to its significant advantages over sandbags. For comparison, one pallet (24 units) of T2 weighing 220kg will build a 1.1m barrier 1.35m wide and 58.8m long. The equivalent in sandbags would be over 12,000 sandbags on 6 pallets weighing 3,000kg. DefenCell can be rapidly employed with small teams and plant, and is certified by the US Army Corps of Engineers for over wash and impact, who also use it extensively for flood mitigation.
