# Customer Checkout Training: Overview

**The following session is designed to show you an overview about SAP Customer Checkout. When you end this training you should know:**

- What is SAP Customer Checkout
- How to position SAP Customer Checkout
- What are the key benefits of SAP Customer Checkout and a high level functional overview
- What are the technical components and system requirements
- What countries and languages does SAP Customer Checkout support

# What is SAP Customer Checkout

# SAP Customer Checkout

***SAP Customer Checkout covers all common point of sale requirements that you need for a fan shop or retail store. From sales to discount campaigns, SAP Customer Checkout gives your sales staff all the information they need.***

***Customers can pay in cash, with standard EC and credit cards, or vouchers – either at stationary cash registers or via staff members' hand-held tablet PCs. Special offers like discounts, loyalty cards, and apps are easy to integrate in your point of sale application***

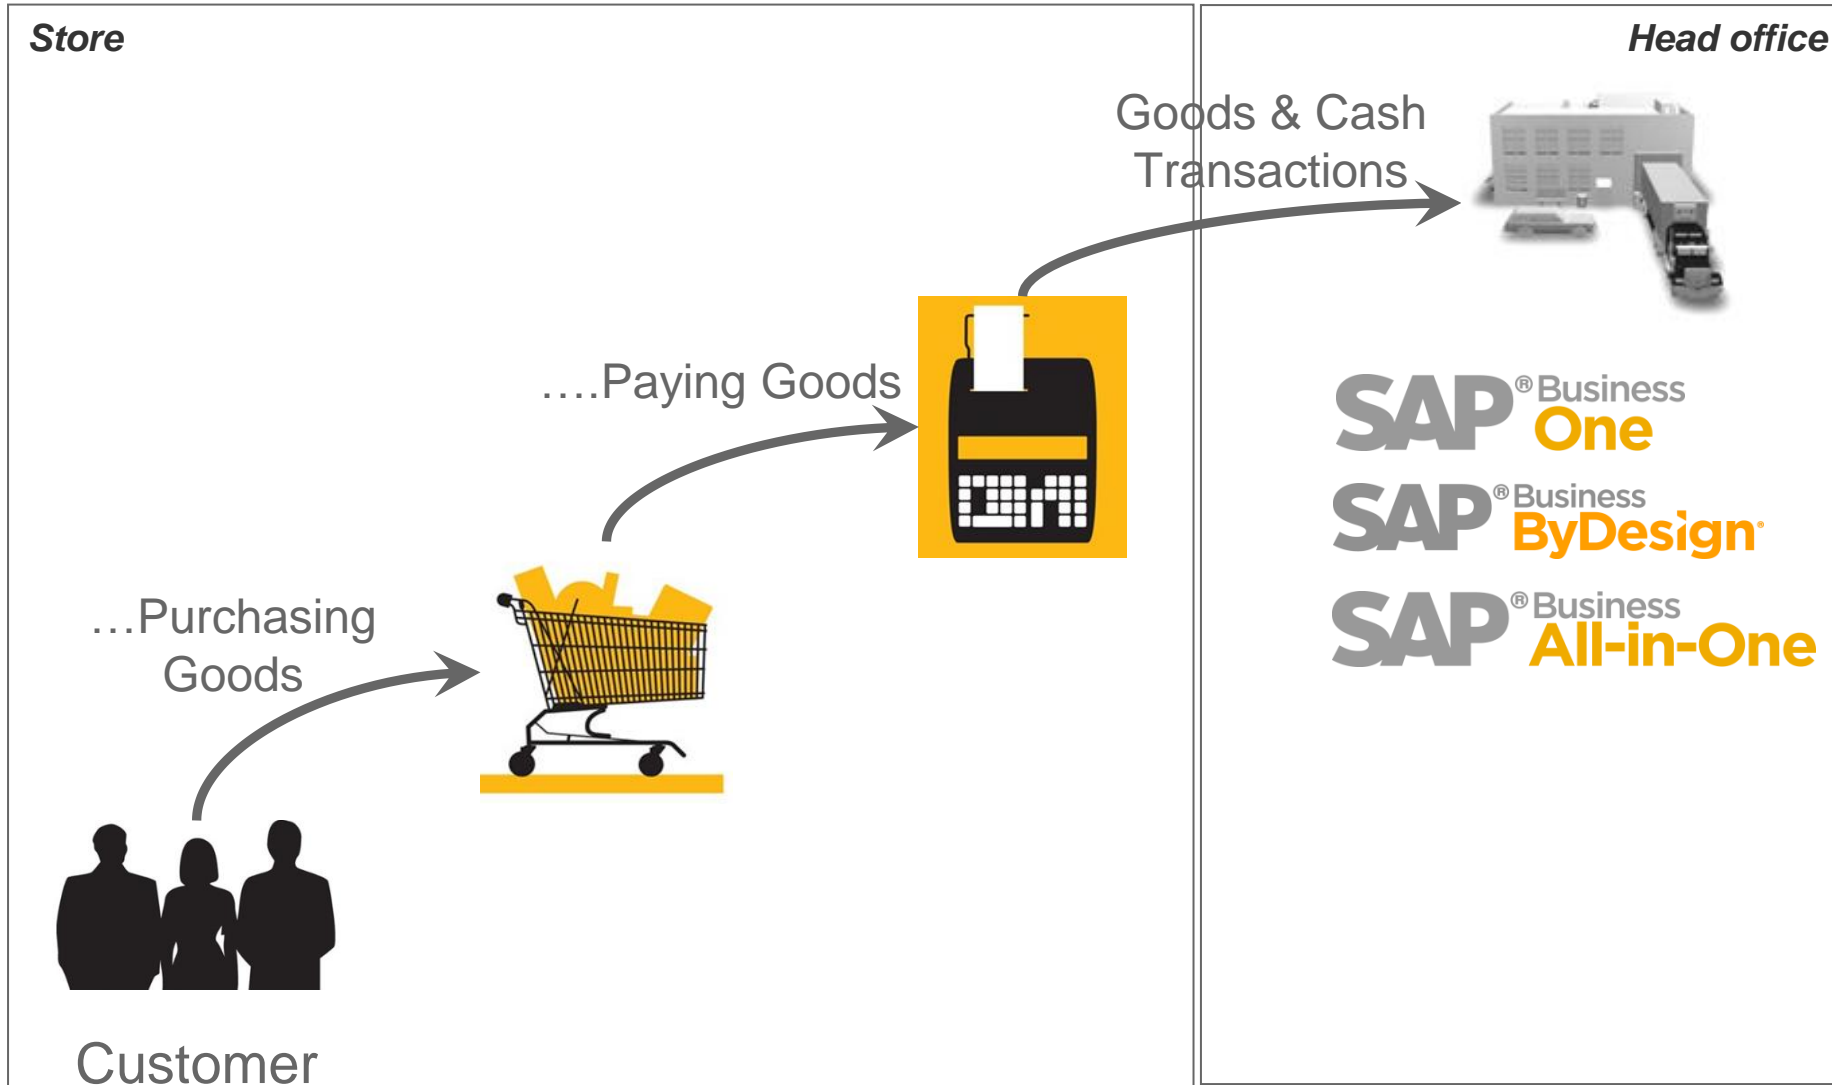

**Everything you need to sell in  
Retail Shops**

## **SAP CUSTOMER CHECKOUT HELPS YOU WITH:**

- Merchandise sales and returns
- Cashing up and daily accounts
- Discount and voucher management
- Payment with cash, cards, and vouchers
- Integration of customer orders (down payments, invoices)

- Master Data integration with SAP

# What are the technical components and system requirements

# Technical Overview

The SAP Customer Checkout system landscape comprises the following components:

- ✓ **SAP Customer Checkout application**

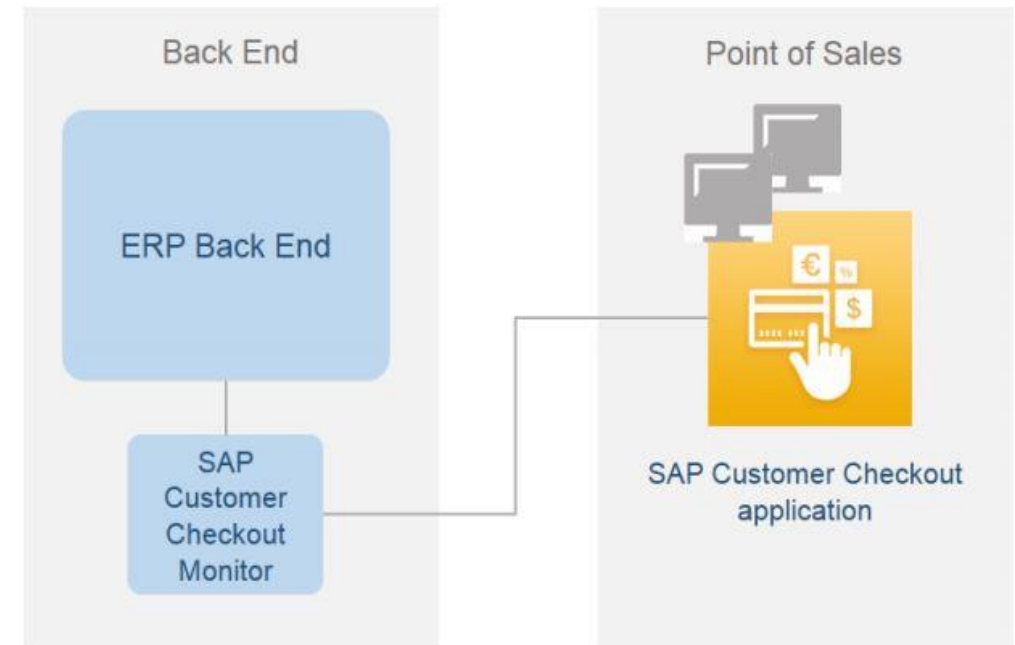

The application you install on your cash desks. It provides views for sales transactions, for cash-in and cash-out, cash desk closings, and cashing up. Here you also find the configuration views for configuring the application.

- ✓ **An ERP back-end system**

The back end which holds the master data, for example, articles and customer data, and which is used for accounting. You can integrate SAP Customer Checkout with an existing system of SAP ECC, SAP Business One, or SAP Business ByDesign.

- ✓ **Optional: SAP Customer Checkout Monitor**

The monitor is tailored for use with SAP Business One. It uses the SAP Business One integration framework. Using the monitor, you can display and edit receipts, cash transactions, and invoice payments that SAP Customer Checkout applications have sent to SAP Business One. It also offers a drawer management, and the administration of users and roles.

# System Requirements

- ✓ Operating system: Windows (Mac OS X/ Linux)
- ✓ Hardware: Min. 1,8 GHz Atom CPU, 4 GB RAM
- ✓ POS – Hardware: Java POS Standard

## Further Details:
