

Eralis Job for SAP Business One gives you the power to manage jobs and activities more effectively, from beginning to end. Capture all job-related costs and monitor progress in real-time.

ERALIS / JOB

Monitor Every Aspect of Your Jobs in a Single System

- Get a view on profitability
- Manage resources more effectively
- Access real-time cost information
- Improve inventory control based on customer requirements
- Accurately track the true time and cost of delivering services
- Gain visibility into business operations
- Manage equipment warranty, servicing and ongoing maintenance
- Integrate with SAP Business One service calls
- Be proactive with custom alerts of contracts due for invoicing, over-budget or over-due jobs

SAP® Certified
SAP Business One Integration

"We have far more confidence in our financial numbers [using Eralis Job], because our information is more accurate and timely."

Stay on Top of All Factors that Impact Your Business

Contract Management

- › Bill customers based on phases or milestones, with retentions
- › Track change variations
- › Report accurately with estimated cost to completion calculations

Easy Time Capture

- › Enter time and resources on the go with a web-based interface (optional Eralis Anywhere extension)
- › Maintain data quality with approval and posting procedures

Integrate Scheduling

- › Assign and schedule staff and resources to jobs
- › Create job timesheets
- › Track job and customer history with SAP Business One activities

Manage Staff, Resources and Materials

- › Enter time, resources and materials from one easy screen
- › Track serial and batch numbers

Streamline Invoicing

- › Time and materials, or invoice to quote
- › Allows pro-rata invoicing and under / over recoveries
- › Consolidated invoicing
- › Integrated with SAP Business One general ledger

Increase Purchasing Efficiency

- › Purchasing and vendor invoicing direct to jobs
- › Make purchases based on estimates
- › Consolidate purchasing across jobs

Job Card Entry

- › Direct time, material and resource entry
- › Buyer-created invoices
- › Fixed price, time and material invoicing

Document Management

- › Attach documents to jobs
- › Store documents inside the SAP Business One database for added security
