The Eralis Rent extension for Eralis Job offers a complete solution for managing jobs that incorporate equipment rentals.

ERALIS / RENT

Integrated Job and Equipment Rental Management

› Reduce complexity with a structured approach to quoting and rental contract creation

› Centralize data in a single system

› Increase efficiency with streamlined workflows

› Access real-time visibility for faster, more informed decision making

› Enhance accountability with tracking of unreturned equipment, and flexibility for additional billing or stock adjustments as required

SAP® Certified
SAP Business One Integration

A structured approach to quoting and rental contract creation that flows through to equipment dispatch, return and variance control. Invoicing flexibility allows for detailed real-time cost and profit analysis at the click of a button.

A Complete Equipment Rental Management Solution

Greater Visibility Starts with a Quote

> Detailed quoting capability allows tracking of all costs, potential revenue and profit associated with equipment rental for a given job

> Historical data on rental inventory provides visibility of your most profitable rental lines and opportunity cost of having unrented items

Plan, Allocate, Dispatch

> Easily access up-to-the-minute information to plan pre-allocate and deliver rented items to agreed schedules

> Multiple dispatches and returns cater perfectly to larger projects

Flexibility is a Prerequisite

> Complete control over invoicing, down to frequency and individual invoice amount for more complex rental contracts

> Billing and cost accrual can be independently suspended if necessary

Built-in Returns Manager

> Efficient receipt of equipment back into stock

> Finalize rental transactions on the agreement

> Return stock quantities are determined by the user for ultimate accuracy and accountability
