serious about business

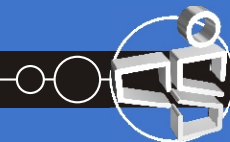

CISTECH's Serious About Retail seamlessly integrates with SAP Business One to provide all the functionality a progressive retailer needs to optimise their operation.

Serious About Retail has become the solution of choice for SAP Business One Partners requiring a fast, stable, easy-to-use, feature rich Point-Of-Sale solution catering for a wide range of industries - from Fast Moving Consumer Goods to Hospitality.

all the functionality a progressive retailer needs

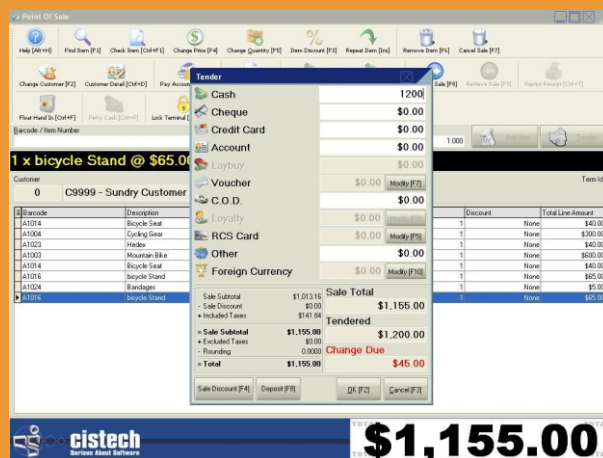

serious about business

Why Serious About Retail?

- ✓ It turns SAP Business One into a full business management solution for the Retail Industry.
- ✓ It offers far more than just pure Point-Of-Sale.
 - ✓ Print Barcode and Shelf labels for Goods Receipts created in SAP Business One.
 - ✓ Suspend and Retrieve sales transactions.
 - ✓ Issue Quotations and Orders directly from the Point of Sale.
- ✓ It consolidates all front office functions for direct-to-customer transactions.
 - ✓ Quick and easy sales transaction capture.
 - ✓ Account sales & payments.
 - ✓ Barcode scanning.
 - ✓ Specials, Promotions & Discounts.
- ✓ It provides a full cash handling process.
 - ✓ Float hand-outs & cash drops.
 - ✓ Cashup.
 - ✓ Petty Cash.
- ✓ It provides enhanced security features like fingerprint and card swipe verification in addition to user passwords.

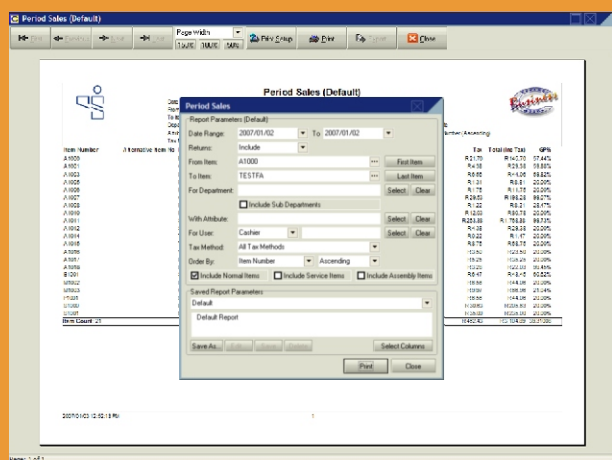

- ✓ It provides integrated on-line credit and debit card transaction processing using Nomad EFT, removing double entry fraud and speeding up client transactions.

More About Serious About Retail

- ✓ Serious About Retail is a stand-alone retail solution with a separate database.
- ✓ SAP Business One is used for master data maintenance. All required data is replicated to CSARetail from SAP Business One
- ✓ CSARetail transactions are posted to SAP Business One using the DI API to ensure that all business rules are enforced.
- ✓ Serious About Retail provides a FMCG (scanning) transaction processing interface as well as a full touch screen & hospitality interface.
- ✓ Designed to be robust & easy to use, CSARetail leaves less room for mistakes.
- ✓ Low operator training & skill level requirements help to reduce the initial investment as well as total cost of ownership.
- ✓ Serious About Retail provides vast configuration options and industry standard peripherals including Barcode Scanners, Slip Printers, Pole Displays, Scales and Cash drawers are supported.
- ✓ Because Serious About Retail functions as a stand-alone application outside SAP Business One, it provides an additional level of redundancy, which means keeping the retail operation's doors open even in the event of communications failure.
- ✓ No permanent connection to SAP Business One is required, reducing server resource demands.
- ✓ Serious About Retail is scalable to any size enterprise that SAP Business One can accommodate.
- ✓ Direct LAN or remote FTP integration provides architectural flexibility. Using the remote FTP integration option allows a solution to be provided to very small outlets where an on-site SAP Business One installation cannot be cost-effectively justified, while maintaining the power of SAP Business One at head-office.

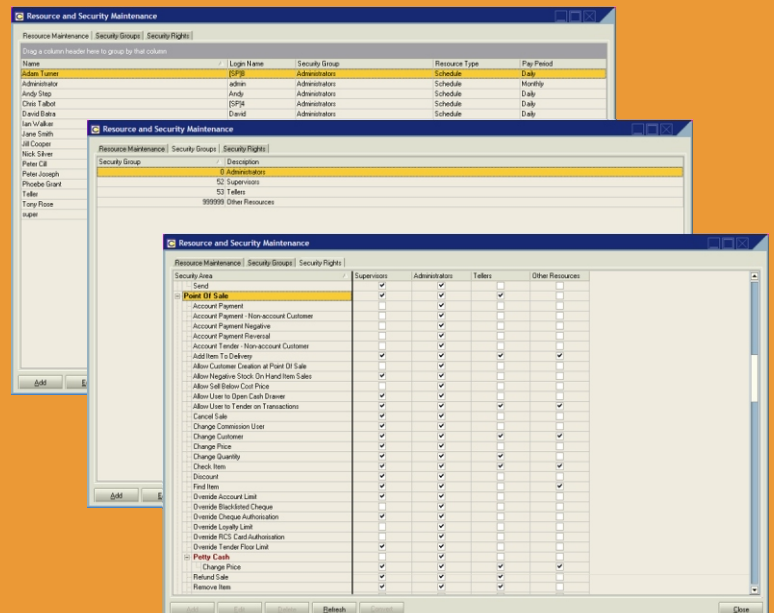

retail software that works, period

Security

- ✓ Users are imported from SAP Business One and can be converted to POS users.
- ✓ An unlimited number of Security Groups can be created with different Security Rights assigned to each.
- ✓ Access to functionality to all the areas of the software is controlled by Security Rights.
- ✓ When a user has insufficient rights to perform a function in the POS, an automatic prompt for supervisor override is displayed.
