

Seminar: Porosome-mediated cell secretion with Bhanu P. Jena

Welcome to attend a seminar with Professor Bhanu P. Jena, Wayne State University School of Medicine on 9th September. No registration needed.

Secretion is a fundamental process through which cells communicate with their environment and exchange information in a multicellular context to reach homeostasis and sustain life. The nanoscale transmembrane cup-shaped lipoprotein discovered by B. Jena and named the 'porosome' have since the original discovery 1996 been implicated in a wide range of secretory events, including the release of exosome-like vesicular bodies.

Time: September 9 at 11:00.

Location: Biomedicum, Peter Reichard, Floor 3.

Speaker: Professor Bhanu P. Jena, Department of Physiology, Wayne State University School of Medicine.

Host: Lars Larsson, Department of Physiology and Pharmacology.

Welcome!
