

Intro to Algebra: Algebraic Expressions

$$1 \text{ burger} + 3 \text{ burgers} = \underline{\quad} \text{ burgers}$$

$$4 \text{ cans} - 1 \text{ can} = \underline{\quad} \text{ cans}$$

$$2 \text{ tacos} + 4 \text{ fries} + 1 \text{ taco} = \underline{\quad} \text{ tacos} + \underline{\quad} \text{ fries}$$

$$2 \text{ ice cream cones} + 4 \text{ cans} - 1 \text{ ice cream cone} = \underline{\quad} \text{ ice cream cones} + \underline{\quad} \text{ cans}$$

$$5 \text{ burgers} + 6 \text{ burgers} + 1 \text{ burger} = \underline{\quad} \text{ burgers}$$

$$4 \text{ fries} - 3 \text{ fries} + 2 \text{ fries} = \underline{\quad} \text{ fries}$$

$$6 \text{ ice cream cones} - 2 \text{ ice cream cones} - 4 \text{ ice cream cones} = \underline{\quad} \text{ ice cream cones}$$

$$3 \text{ Combo Meals} = \underline{\quad} \text{ fries} + \underline{\quad} \text{ cans} + \underline{\quad} \text{ burgers}$$
